Findings:

Per the compliance visit on 11/17/17, the following corrections are necessary based on the above mentioned rules:

1. Please add a smoke detector to the top of the upstairs hallway.

2. In addition to your emergency maps you must also have an emergency preparedness plan in writing to address evacuation, shelter in place, and lock down procedures. Please refer to the rules listed above for specifics, we also discussed this at the time of our visit. I provided a template to assist you with this requirement at the time of our visit. You should review these plans with all daycare parents. You will also need to have all daycare children's emergency information in a concise location which you can easily take with you in the event of an emergency.
I would also suggest contacting CCR&R, as indicated in suggestions, if you would like additional assistance creating these plans or planning for emergencies.

3. Regarding children's files, 4 of 8 children in care need an updated physical on file. Children in need of updates include: HM, AC, AS, CS. Parents have 60 days from the date this information is requested to provide it to you. Any child that does not have the required paperwork within this time-frame may not be able to return to care until it is received. The only exception is if the child meets standards for homelessness, which is listed above in the rules.
