

Income Withholding Payment Calculator

The Income Withholding Payment Calculator is a tool to estimate the withholding amount based on the employee's pay period schedule. If the court ordered amount of support is not a monthly amount, first use the Conversion Calculator to get the monthly amount.

PLEASE NOTE: *This is for informational purposes only. The actual amount withheld may be different. Past due support may also be included. An employer may withhold a maximum of 50% of wages.*

Information that you need to use this calculator:

- Monthly court ordered child support & cash medical support amount, if ordered.
- How often the person paying support is paid (weekly, bi-weekly, twice per month, monthly, etc.)

Enter the information in the Income Withholding Payment Calculator to determine the withholding amount based on the pay period schedule.

Income Withholding Payment Calculator

(For current support cases only)

Monthly court ordered child support amount	
Monthly court ordered cash medical support amount, if ordered	
Total monthly court ordered child support & cash medical support amount
