**I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS**

Not applicable.

**II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:**

ASAC Heart of Iowa is one of the "oldest, largest, and most comprehensive substance abuse prevention and treatment agencies in the state of Iowa". Specifically, ASAC Heart of Iowa Child Care Center became licensed in 2002. ASAC Heart of Iowa Child Care Center provides care to children age infant through school-age while their mothers are receiving inpatient substance abuse treatment. The program does have an on-site residential treatment component. Current enrollment is 20.

ASAC Heart of Iowa Child Care Center combined director/on-site supervisor is Amanda Meggenberg. Ms. Meggenberg has been the combined director/on-site supervisor since July, 2020. Ms. Meggenberg has a BA degree in psychology and criminal justice and over 23 years experience working with children.

On 6/26/2023, program space was observed.

**III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:**

ASAC Heart of Iowa Child Care Center is unique and serves an important role for mothers recovering from addiction. The program is located in a residential neighborhood in a
predominantly urban community. ASAC Heart of Iowa Child Care Center provides full-time and part-time childcare options depending on the needs of the mother and family.

ASAC Heart of Iowa Child Care Center maintains the following website for families and the community http://www.asac.us/treatment/heart-iowa/.

ASAC Heart of Iowa Child Care Center has a history of participating in quality initiatives including a local quality initiative, CACFP and QRS. This program has a past QRS 2-Star. Ms. Meggenberg discussed future goals including participation in IQ4K.

ASAC Heart of Iowa Child Care Center operates under a board of directors.

Ownership and management of the program has remained consistent. Ms. Meggenberg has been the director of this program for 3 years. Congratulations! Ms. Meggenberg has goals for the program as well as herself. Currently, Ms. Meggenberg is acting as interim all program-Heart of Iowa director as well as the specific childcare director. Ms. Meggenberg discussed plans for herself to achieve CDAC certification. Ms. Meggenberg continues to establish systems of organization to help ensure administrative items are completed as required and maintained in a secure manner. As a result, the program experiences smooth daily operations. Ms. Meggenberg is knowledgeable of licensing guidelines as well as their own program's policies and procedures.

The program continues to retain seasoned staff. Staff reported celebrating 15 years, 14 years, 7 years and 2 years with this program. Staff discussed how "...the moms always say kids are happy to be with them...there's many opportunities for one-

on-one individual interaction..." Ms. Meggenberg has reported being proud of their team of employees who are able to go with the flow in some of the most unique and challenging as well as joyful situations. Ms. Meggenberg continues to acknowledge staff's immense communication with families and the modeling of child cares. Ms. Meggenberg continues to emphasis how their team has a strong willingness to not only help the children but also the families move forward. The program does utilize WAGE$ for those eligible.

ASAC Heart of Iowa Child Care Center has emergency plans, policies, and procedures in place which are annually reviewed and updated as needed. This childcare has successfully navigated through seasonal local flooding events, 2008 historic Linn County Flood, 2019 Polar Vortex, 8/10/2020 Derecho Storm, 2019 health (Covid-19) pandemic and 2023 repeated poor air quality.

ASAC Heart of Iowa Child Care Center has an organized parent/program communication center which includes required postings and child sign-in/ sign-out information. This area also includes program reminders, community resource information, and information about upcoming program events/curriculum. Classrooms continue to be arranged in a thoughtful manner with learning at the forefront. Curriculum supports children learning through play. Communication between children and staff is done verbally and with picture cues. School-age summer 2023 field trips include local parks and splash pads. On-site events historically include an annual cook-out.

ASAC has an administrative support team, cook, and building/maintenance team which help ensure program space is safe, sanitary and hazard free each day. Recent past building updates have included roof replacement, window screen replacement, and updated outdoor play spaces (e.g. equipment, cushion surfacing). Ms. Meggenberg discussed future remodeling goals to open up an area of the building for better building flow and patient support access.

ASAC Heart of Iowa Child Care Center has much community support. The program connects and equips mothers in recovery with education services, mental health services, independent living skills, vocational assistance, medical care, transportation, special support services for children, and housing. The program collaborates with many community partners to accomplish connections including local counseling agencies, school districts, local businesses, health professionals, and early access services. The on-site program kitchen is inspected at least annually by the local Health Department (last inspection 7/11/2022).

ASAC Heart of Iowa Child Care Center has a history of offering family events including weekly "Mommy and Me" classes, family events (e.g. picnics, splash pad days, ice cream socials), a Family Education Day, and family outreach sessions. The childcare program operates extended hours on Mondays to allow recovering mothers the opportunity to attend evening support groups.

On the day of the monitoring visit, staff were nurturing and attentive to the children's needs. Staff were observed warmly greeting children and moms at drop-off. Children have access to an array of materials (e.g. books, imaginative play options, building materials, crafts) that encourage innovative play. Activities observed were many (e.g. infant/toddler cares, small group projects, one-on-one play experience). Most noteworthy were the day's school-age frog craft project and one-on-one baby doll place setting play in the 2yo room! Staff provided a companionable presence allowing children to have many choices in their play experiences. Routine transitions (e.g. clean up activities, food service rituals) worked smoothly into the program's welcoming and cooperative play environment. Staff were overheard providing children with many words of encouragement. Children responded well to staff and appeared to be enjoying their day.

**IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:**

109.9(1)e: All files contain documentation to indicate that ongoing staff training requirements are met, including current certifications in first aid/CPR and mandatory child abuse training.
- Staff file (CH) lacked documentation of required annual professional growth hours.

109.11(7)c: All centers: Annual inspection prior to heating season of all fuel-burning appliances to reduce risk of carbon monoxide poisoning and shall install one carbon monoxide detector on each floor that conforms to UL Standard 2034.
- A UL Standards 2034 carbon monoxide detector was not in use on the lower and upper levels of the building on the day of the monitoring visit.

**V. SPECIAL NOTES/RECOMMENDATIONS:**

Ensure all materials and furnishings on-site meet US CPSC and ASTM standards including not having been subject to recall (e.g. possible Bumbo-style infant room seat).

The costs of business include budgeting for regular maintenance/repairs, replacement, and refreshes. Areas of childcare/building flooring are dilapidated (e.g. stained, cracked, chipped) making it difficult to ensure proper cleaning and

disinfecting. Remedy.

Licensing strongly recommends a hand washing sink be added to the preschool-age room. This will help with sanitation and repeated trips to the public restrooms located in the front entrance of the building.

_____

The program's license remains in full status. Thank you for the visit.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
