	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Jana Drew **Date:** 05-26-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

Visited center on 05-25-23 and spoke with director Tammy Behrens resigned. Ms Behrens has several years of experience working with children. Alyssa Maxwell is the new onsite supervisor as Jessica Whitney resigned. Kids Kampus Inc is a daycare program that opened in 1990 and was administered through Baum-Harmon Hospital in Primghar, however, in June 2018 the center went on their own and is no longer affiliated with the hospital. The center consists of two rooms: a infant to two years old and a larger room from 2 years to school age. They only have school agers in the morning/after school or when there is no school as well as during the summer. During the summer the school agers will go on field trips while the younger children are napping. The center operates Monday through Friday 6am to 6pm. There are 41 children enrolled in the program although not all attend at the same time due to capacity being at 46. At the time of the visit there were 25 children present.

A full licensing visit was conducted and the director was present throughout the visit. All areas of the program were observed. These areas observed consisted of classroom observations and activities, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review. The center continues in following all guidelines put forth by DHS regarding the corona-virus and doing everything they can to support their staff and families. The center has been cleaning toys that children use. Blankets are washed weekly.

The large room (ages 2 through school age) has the following areas throughout the room for the children to explore and learn: kitchen, legos, books, toys, puzzles, music, sand/water table and games. Children have access to bathroom and sink. Good room arrangement with centers throughout the area. Sufficient amount of toys and equipment for the number of children. They have their own curriculum with monthly themes and daily schedule of activities was posted. Displayed throughout the room were numbers, days of the week, pictures of the children, child size furniture, children's artwork and the alphabet.

The infant room is divided into two sections within one big room. This allows for better staffing of the children as well as ability for children to have more space to move around. Diaper changing table and sink are accessible. Sufficient amount of toys and infant equipment such as swings, rocking chair and highchairs in the room. Toys and equipment are at the children’s level and accessible. The room is colorful and windows are at children's level so they can look outside. Staff do daily infant sheets for parents and parents provide diapers, wipes, and formula. Toys are cleaned daily. Infant room also needs to post a schedule.

The program is looking at doing a big expansion for the center to add on 3 additional rooms and the center will then have an infant to 2 years old, a 2 year old room, 3 year old room, 4 year old room and a school age room. They hope to break ground later this summer. The program will also update and expand their kitchen as well. They will also be updating their playground area.

Meals are prepared onsite in the kitchen. Food storage practices are good. The center is on the CACFP and follows their guidelines for nutrition. Refrigerator is clean and kept at the appropriate temperature.. Menus were posted.

Center follows policies on administering medications. When they administer medication it is inaccessible to the children and they complete the medication sheets. Staff and children exhibited good hand washing procedures. First aid is sufficient to treat minor injuries. Fire/tornado drills are documented monthly. Good sanitary procedures are followed. Center has a carbon monoxide detector. Annual heating inspection is complete. Radon tests has been completed but needs to be completed in all child occupied rooms. Center has a mitigation system. There is an exhaust fan in the infant area that needs to be fixed.

Fenced-in playgrounds are adjacent to the center. There are 2 separate playgrounds as they no longer have an infant playground due to the potential expansion. They have made the 2/3 years old playground to allow for under twos. The two year old playground has swings, a playhouse, climbing equipment and slide. The large playground has climbing equipment, slides, basketball hoop, playhouse, teeter totter, picnic table and swings. Pea gravel is around all the play equipment. The playground needs an updated fence as there are areas to where the fence is not secured on the bottom. Monthly playground inspection are completed. Shade is available on all the playgrounds. The center had done a fund raiser to update the playground, however, will complete when the expansion of the building is completed. They have applied for grant monies to put in new fencing, new surfacing, moving swings, sidewalk for the infant area. It is recommended that the center continue working with CCRR(Childcare Resource and Referral) as they update their playground.

They use a center van to transport children to activities around town (library, etc.) for field trips. The center had maintenance records for their van. Parents provide care seats if they are needed. With the 2022-2023 school year the school started picking up and returning children to the childcare center.

The center is in the process of looking at putting an addition onto the building to be able to separate ages of the children more. They have applied for some grants and along with the center's Parent Advisory committee have done some fund raises. The center's goal in the addition would be to add 3 classrooms and more bathrooms.

The director feels her staff have a good relationship with the children/parent's and work good as a team. Staff are dependable. Center has a parent advisor board who is very active and helps center get what they need, the community has been great to serve their children. The director does monthly staff meetings to help in communication.

Goals of the center are to get on IQ4K program, to complete expansion of the center. The director would also like to update their playground, hire lead staff and assistance for each room for consistency.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

Center is on the food program.

Center plans to do IQ4K.

Center sends home a monthly newsletter to the parents.

Children's toys are at their level and accessible.

Center has child size furniture throughout the area.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.11(3)a: Center shall ensure that: Facility and premises are sanitary, safe, and hazard free. Adequate indoor and outdoor space is provided. The outdoor area shall include safe play equipment and area of shade. Sufficient space provided for dining. Sufficient lighting shall be provided. Sufficient ventilation. Sufficient heating. sufficient cooling. Sufficient bathroom and diapering facilities. Equipment, including kitchen appliances, are maintained so as not to result in burns, shock, or injury to children. Sanitation and safety procedures for the center are developed and implemented to reduce risk or injury or harm to children and reduce transmission of disease.
Exhaust fan in infant room needs to be fixed as well as the playground fence.

V. SPECIAL NOTES/RECOMMENDATIONS:

Center is to email consultant by 06-30-23 confirming that all items that fall below standards have been completed.

A full license will remain in effect at this time.

At least one visit will be made to the center during the next year.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
