X	**FULL** license from 06-01-2024 to 06-01-2026
	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Nate Knepper **Date:** 05-14-2024

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A.

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

A licensing visit was conducted on 5/14/24. The two owners/on-site supervisors were both present for the visit.

All areas of the program were observed. These areas observed consisted of classroom observations and activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review.

West Side Kids Incorporated opened in July 2005 and they are located in Waukee, IA. The director is Cindy Vokes. The on-site supervisor is Erica Shepherd. The activities director/on-site supervisor is Erin Christianson. These three individuals are also the owners of the center. The center serves children as young as six weeks old and up to 12 years in age. The center utilizes their own learning curriculum based off of several other learning curriculums with children which includes the Creative Learning Curriculum and Handwriting Without Tears Curriculum.

During the visit, children were observed having tummy time in the infant classroom and free-choice play in some of the other classrooms. Preschool children were observed playing on the playground. Later these children were observed washing their hands and sitting down for lunch at the child-size tables and chairs. Children gave specific and sufficient answers as to how and when they practice their monthly fire and tornado drills. Staff were engaged with children and all of their activities.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

The center is family owned. In addition, several staff members have worked at the center for several years now.

There is an Advanced CNA staff member on site.

The center utilizes their CCR&R consultant as well as their nurse consultant as needed.

Within the past year, interior painting has been completed and new carpet installed. The center also purchased cordless blinds for classrooms.

There is a secure entrance into the main classroom areas. Each family has their own code. Other visitors have to ring a doorbell to gain access. The director's office is also next to the foyer area that individuals/families first enter into.

The entire center is nicely decorated, smelled clean, and looked clean. Staff get a checklist they go over daily in regards to health, cleaning, and safety procedures.

The center has their own website as well as a Facebook page. The center also uses the electronic Brightwheel application.

Good staff/child interactions were observed during the visit.

The center has Spanish and French lessons for younger children. The center also teaches children sign language.

The center strives to get staff more annual professional development training that required by the State.

There is an incentive/reward program in place to recognize staff achievements/milestones.

Management believes they have a good staff working for them. The center has a family atmosphere.

Enrollment remains steady.

The center has an outdoor garden and apple trees where they grow their own fruit and veggies and eat what they grow.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.9(3): Signed and dated Iowa immunization certificates are on file for each child enrolled.
Number missing: 0
Number invalid: 1 child immunization was not dated.

109.11(3)a: Center shall ensure that: Facility and premises are sanitary, safe, and hazard free. Adequate indoor and outdoor space is provided. The outdoor area shall include safe play equipment and area of shade. Sanitation and safety procedures for the center are developed and implemented to reduce risk or injury or harm to children and reduce transmission of disease.
1. More wood chips are needed around the fall zones of the large climbing structure.
2. Cleaners and similar products should be kept out of children's reach. This was an issue in the school-age classroom (school-age children were in school at the time of the visit).

109.12(1): Program structure that uses developmentally appropriate practices and written program of activities planned to the developmental needs of children served. Program complements but does not duplicate school curriculum. Schedule of program is posted in a place visible to parents.
The AM, PM, and Full Day schedules need to be posted in the school-age classroom.

V. SPECIAL NOTES/RECOMMENDATIONS:

Radon testing was last completed 4/21/23 - 4/24/23. All classrooms came back with radon levels below the 4.0 cutoff. Because levels were below 4.0, the center can move to testing for radon at least every five years now. So long as radon levels remain below 4.0, they can remain on a five year plan. If at the next testing, levels in any classroom come back 4.0 or higher, the center will have to have a mitigation plan, retest, and at least temporarily move back to testing every two years.

The furnace was replaced in 4/2023 and last inspected 11/22/23.

I-Power and IQ4K were discussed at the visit. The center has most of their staff in I-Power and it appears training hours are being uploaded.

A new, full, two-year license is recommended.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
