Findings:

An annual compliance check was completed on 6/13/24 and the following was out of compliance:

441 IAC 110.8(1)“b” All accessible electrical outlets shall be tamper-resistant outlets or shall be safely capped.
Chantielle had a few outlets not capped.

441 IAC 110.8(1)“g” The home shall have at least one 2A 10BC rated fire extinguisher located in a visible and readily accessible place on each child-occupied floor.
Chantielle had a fire extinguisher on each level of the home but it was not the approved size.

441 IAC 110.8(3) “d”
The provider shall establish procedures related to infectious disease control and handling of any bodily excrement or discharge, or blood. Soiled diapers shall be stored in containers separate from other waste.
Chantielle indicated that at times she puts diapers in the regular garbage and we discussed the need to have them separate.

441 IAC 110.9(4) Children’s Files. An individual file for each child shall be maintained and updated annually or when the provider becomes aware of changes. The file shall contain:
An admission physical examination report signed by a licensed physician or designee in a clinic supervised by a licensed physician
The date of the physical examination shall not be more than 12 months before the child’s first day of attendance at the child development home.
The written report shall include past health history, status of present health, allergies and restrictive conditions, and recommendations for continued care when necessary.
For a child who is five years of age or older and enrolled in school, a statement of health status signed by the parent or legal guardian may be substituted for the physical examination report.
The examination report or statement of health status shall be on file before the child’s first day of care
For children under the age of 6, a statement of health condition signed by a physician or designee submitted annually from the date of the admission physical. For a child who is enrolled in school, a statement of health status signed by the parent or legal guardian may be substituted for the physician statement.
For each school-age child, on the first day of attendance, documentation of a physical examination that was completed at the time of school enrollment or since.
A signed and dated immunization certificate provided by the state department of public health. For the school-age child, a copy of the most recent immunization record shall be acceptable.
Chantielle was missing initial physicals for four of the children in care and immunizations for 2 of the children in care. We discussed that even what she referred to as "drop in kids" should have those items as well. She also was missing an updated physical for one of her kids in care.

Corrective Action Required:

Chantille identified a plan for her establish procedures related to infectious disease control and handling of any bodily excrement or discharge, or blood. Soiled diapers shall be stored in containers separate from other waste. She plans to bag up diapers and immediately take them all outside.

Chantille needs to work with the parents to obtain all of the required documentation for each child's file.
