- [ ] School Age
- [ ] All Ages

LICENSE CAPACITY	Infants	2 Years	Preschool	School-Aged	Capacity
General			42		42
Summer					0

1. Basic Overview

An unannounced licensing visit was completed at this center on 10/2/25. The preschool director, Amy Kruse, was present on the day of this visit along with other staff. Amy has been the director for a number of years. She has a Bachelor's Degree in elementary education with an early childhood special education endorsement, and a Master's Degree in instructional leadership. Amy also functions as the lead teacher for the afternoon four/five year old preschool session. The preschool is owned and operated by the Our Redeemer Lutheran Church. It is governed by a board including church members and parent representatives. The preschool operates out of two rooms within the church building. The preschool rooms are kept secure by locking the classroom doors. The preschool does participate in the Iowa Voluntary Preschool Grant program.

The preschool uses two program rooms, a restroom area, a kitchenette area, space in the fellowship hall for indoor large motor activities, and chapel time with the pastor once per week with preschool staff present for this activity. The program rooms provide for ample space for the children and are very well stocked with age appropriate and accessible materials to support programming needs. Both rooms are nicely decorated and provide for a child friendly environment. The children's crafts and projects are also on display in the rooms and hallways. There are restroom areas for boys and girls across the hall from the three/four year old room. Children from that room have to travel across the hall to use the restroom. The program room does include a sink that is used for hand washing. Children in the four/five year old room have a restroom area with a toilet and sink adjacent to the room and another hand washing sink within the classroom. The preschool has use of the fellowship hall which is a nice space for indoor large motor activities. All program space was observed.

The center does not participate in the CACFP. The preschool provides the snack and beverage for the children. Snack is prepared in the kitchenette area where the preschool uses space in a refrigerator. All dishes are washed in the dish washing machine in the church's main kitchen area.

2. Identify Observed Strengths of the program

This preschool has been in existence for over 50 years. The director of this preschool is highly qualified as outlined above. The staff were once again observed to be enthusiastic and highly interactive with the children and many positive words of encouragement could be heard throughout the preschool. The children appeared to be having a great preschool experience. The staff continue to work very well together. Program rooms are bright with windows and are highly organized with plenty of accessible materials, generally clean, and very well maintained. The center has plenty of books which are arranged by topic for easy accessibility to support program curriculum. The program offers parent/teacher conferences twice per year for the three year old program and three times per year for the four year old program. The preschool continues to participate in the local AEA program where materials to supplement the preschool can be borrowed from the AEA even though this program is no longer free of charge. The program participates in the Swiss Valley Naturalist program which includes that program visiting the preschool twice per year. The preschool participates in the Harvest of the Month program which

provides a healthy snack to the preschool from a local business. Dental and vision screenings are provided on site at the preschool. Very detailed newsletters and activity plans are posted and provided. Staff and child files and other required licensing documentation continue to be highly organized. The continued attention to detail and organization of every aspect of this program by the director and staff does not go unnoticed.

3. Identify the aspects that fall below the standard

N/A

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

N/A

5. Special Notes/Recommendations

The preschool will continue with a full license. This report does not require a written response. Thank you.

Date: 10/09/2025

HHS Licensing Consultant: Heidi Hungate

Non-compliance with any of the mandated regulatory requirements listed above may lead to the cancellation or revocation of your Child Care License. Please take steps necessary to completely address each of the violations noted above.
