Program Population Served:

- [X] Infant(0<24 mos)
- [X] Toddler
- [X] PreSchool
- [ ] School Age
- [ ] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Leslie Sporrer has been providing childcare services since 1999. She completed her education by receiving her Child Development Associates degree. The childcare is located on the lower level of the home. The space is large and it is set up in play stations. The provider reported that while they have a general schedule throughout the day, play is mostly child-led. There are times when she will have a specific craft or activity for the children to work on. They do a daily circle time and complete a series of exercises to get some wiggles out. They do each exercise based upon the date. Today, they did 29 of each exercise.

2. Identify Observed Strengths Of The Program

Compliance staff observed the provider with the children in care. She was attentive to all of the children and made sure they all had an activity to keep them busy. Some of the children were coloring at a table while others were playing with toys. The provider uses a calm voice when speaking with the children.

The provider stated that she believes her strengths include having a dependable business for her families. She communicates daily with parents to ensure they know what is going on throughout the day. She also appreciates communications she receives from her families, especially when children are involved in other activities or preschool during her business day.

The provider reported that she will use redirection when necessary with the children. If behaviors escalate or continue, she will have a child sit for a while to give them thinking time.

3. Identify The Aspects That Fall Below The Standard

110.8 (1) e : An annual laboratory analysis shows satisfactory bacteriological quality if a private water supply is used. Nitrate analysis when children under 2.

**The provider was unable to locate the test that they had completed in 2025 to test the water. She stated that they have not had issues with their water or they would use bottled water.

The provider will need to send compliance staff a photo of the 2025 water test or have a new water test completed and have the report to compliance staff by June 29, 2026. Photos can be texted to 712-435-0576.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

6. ADDENDUMS:

- Addendum1: The provider came into compliance by submitting requested information timely.

This Addendum is approved by supervisor on 8/17/2026
