II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

The center requested to have additional classrooms reviewed for expansion of services. This includes an additional classroom on the lower level that would be used for school age children, and several classrooms on the upper level that could be used for preschool and/or school age children. Notification was received from the Fire Marshal on 04-01-25 that the facility had been inspected and fire code occupancy load determined and approved with the requirement that children under 30 months of age remain in the current classrooms occupied by those age groups, and that any children requiring mobility assistance or ADA accommodations for mobility are served on the ground level and not on the second level of the building. The overall licensed capacity of the center is increased to 164 children if all additional potential classrooms were to be utilized.
