CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Whitney Vanderpool has been providing childcare services for 18 years. She currently has openings for full time childcare. Her hours will vary depending on the family she is working with. At this time, she has been starting at 5:30 am to 7:40 am. She also has an occasional drop in child that is there in the morning hours as well. The main floor of the home is utilized for childcare services. The provider uses one bedroom if naptime is needed for children. The home has all of the required signage for childcare. Emergency routes are visible for children and families who utilize this childcare.

2. Identify Observed Strengths Of The Program

The provider is flexible and is willing to work with families schedules. At this time, the provider is also able to provide morning transportation to school for school aged children. This could change depending on the number of children in care.

The provider has toy options for all ages. She will rotate toys for the children every few weeks. Most of the day is free play when children are present. If there are older children in care, she will have activities to keep them busy.

The provider will have the children outside as much as possible when the weather is cooperative.

3. Identify The Aspects That Fall Below The Standard

The provider is in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

This is also a reminder that your Mandatory Reporter Training certificate will expire in April 2026.
