CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Sandra Kittle has been working in childcare services for over 15 years. She worked in a center for several years and was a director. She started her in-home childcare three years ago. She has a Child Development degree. The provider is also a foster parent and has many years of experience with children in this manner as well. The provider has six children daily and then will have two who come before and after school. The childcare is located on the main floor of the home utilizing the living room, play room, kitchen and dining area. When compliance staff arrived at the childcare the children were playing with toys in the play room. This room has some play stations set up for the children to choose what they would like to do. The provider has a general schedule for the day, but play is child-led.

2. Identify Observed Strengths Of The Program

The provider has a calm demeanor about her. She utilized redirection with the children when they started pushing the rules while compliance staff was there.

The provider showed compliance staff a seedling shelf and showed seeds that they had from the prior year. She will be working with the children to plant the seeds and start the plants they will later put into the garden. The provider believes that the children need to play outside and get dirty. There is a large area in the back yard that has toys and a sand box for outdoor play. There is also a dirt pile for the kids to play in.

The provider talked about having parent meetings to talk about the child and let the parents know what she is showing the children while in her care. She reported that she will work with children on letters and numbers. She will also help them learn to hold their writing utensil.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
