CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Sheena Keeler has been providing childcare services since 2014. Today there were seven children in care. She reported that she will normally have anywhere between eight and ten children at her busiest times. She does have a substitute who has helped her with the childcare; covering when she needed to be gone for an hour. She also has two assistants who are able to help her when she needs an extra hand. When compliance staff arrived, most of the children were playing with blocks. The provider has an oversized bag of large blocks that the children were building with. The provider was also getting ready for lunch. She works with the food program to provide two full meals and one snack daily for the children. The home is set up with all necessary signage and emergency preparedness planning.

2. Identify Observed Strengths Of The Program

Compliance staff was able to observe interactions between the provider and the children. The children easily approached the provider for questions and help.

The provider shared that she believes one of her strengths is that the children she cares for become family. She maintains open communication with parents and they work together well. She stated that she had a life change and becoming a childcare provider was an easy decision for her and her family at that time. She stated that she has never looked back.

The provider has a general schedule in her childcare day, but the play and activities are mostly child-led interests. They get outside as much as possible with the good weather.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
