	REVOCATION of license

Licensing Consultant: Kathy DeGeorge-Evans **Date:** 03-14-2024

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A.

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

An off-year visit was conducted on 5/22/23. The new director was present throughout the visit.

All areas of the program were observed. These areas observed consisted of classroom observations and activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review. The most recent COVID updates were also reviewed as well as several other illness guidelines.

Manning Child Care Center is a center overseen by a Board and located in a downtown building that also houses a couple of other companies/businesses. The center opened in 9/2002. The center uses their own learning curriculum that is based off of several other curriculums. Children served range from six weeks in age to 12 years in age. The center is open year-round and also provides a drop-in service for families; although 24 hour notice is recommended.

The new director of the center as of 11/2022 is Sara Jean Dahlgren. Sara has past experience working in child care, including this center, and has taken many training hours as well to meet qualifications. The new on-site supervisor is Morgan Cook. Morgan also has past experience working in child care and has taken a number of professional development training hours to meet qualifications.

During the visit, children were observed napping in cribs, having tummy time in the infant room, being held, engaged in free choice play at the different learning stations set up in classrooms, washing their hands, sitting down for the day's lunch, and finally laying down on cots for afternoon naps. Staff were engaged with children and their activities.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

There is a secure entrance into the building. Security cameras have also been installed over the past year.

The center employs a full-time cook

The center has a Facebook page.

The center participates in NAP SACC (physical activities and good nutrition program for children). The center also participates in the 5-2-1-0 program around healthy kids.

The center participates in the food program (CACFP).

Parents receive a monthly newsletter (also an email option for the newsletter).

The center will provide a certain brand of formula as well as baby food for infants if needed.

There is an employee incentive system in place.

The center has good partnerships with other businesses in the community as well as Zion Lutheran Preschool in town.

The new director feels she has a very supportive and engaging Board as well as a good staff.

The director has quarterly staff meetings with other directors in the surrounding area.

The center is a pick up and drop off site for school-age children.

There is an indoor play area when weather does not permit outdoor play.

The center is a drop in center.

The center participates in QRS which is a voluntary program based on best practice. They have begun the IQ4K process as that has now replaced QRS.

Enrollment has increased over the past year.

The new director is organized.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.10(3)c: For ongoing, long term medications, authorization shall be obtained for a period not to exceed the duration of prescription.

109.10(15)b: Emergency instructions, phone numbers, and diagrams for fire, tornado, and flood shall be visibly posted and documented at least once a month for fire and tornado. Records shall be maintained for current and previous year.

109.11(3)a: Center shall ensure that: Facility and premises are sanitary, safe, and hazard free. Adequate indoor and outdoor space is provided. The outdoor area shall include safe play equipment and area of shade. Sufficient space provided for dining. Sufficient lighting shall be provided. Sufficient ventilation. Sufficient heating. sufficient cooling. Sufficient bathroom and diapering facilities. Equipment, including kitchen appliances, are maintained so as not to result in burns, shock, or injury to children. Sanitation and safety procedures for the center are developed and implemented to reduce risk or injury or harm to children and reduce transmission of disease.

V. SPECIAL NOTES/RECOMMENDATIONS:

Administrative Change 3-14-2024 increase in capacity. Infants - 28 children, two year olds - 12 children, preschool 44 children, and school age 24 - total 108 children.

Radon testing was last conducted 5/12/23 - 5/15/23. Two tests are back and were below 4.0. The center is awaiting the other two tests. If radon levels in the two remaining classrooms come back below 4.0, then the center can switch to every five years testing so long as the radon levels always remain below 4.0. If 4.0 or higher, retesting and mitigation plans would need to be initiated and the center would go back to every two years testing.

The annual furnace inspection was completed 5/9/23.

It has been previously noted the center only does walking field trips around the surrounding area.

I-Power and IQ4K were discussed at the visit.

It is recommended staff also document on Pro-Care for daily sheets when diaper cream is not applied for those children with

diaper cream authorizations.

Emergency medications should never be locked up.

It is recommended a door with a lock to the outside staircase be installed for better security.

The director will need to touch base with the center's evacuation location sites to ensure those people know of the emergency plan and to ensure it still makes sense for the center. Local EMS and/or CCR&R can be of assistance with this plan.

Separate monthly fire/tornado drills should be done for school-age children.

The UV Ray Index was emailed to the director after the visit concluded.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
