	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Maggie Gibson, SWIV **Date:** 10-10-2024

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

An unannounced full licensing visit was completed 10-1-24. Both Co-directors/Co-Owners were present through the visit.

Bobcat Academy opened for business on August 15, 2016. The co-owners and directors are Ashley Johnson and Amber Young, who both meet the requirements to be directors. They both have taught in school systems, and both have their Master's Degree. Ashley has a Master's of Education and Amber has her Master's in Special Education. They both also have their Early Childhood Endorsement.

This center is open from 7:00 am-5:00 pm. They provide year round care. They serve children from infant age up through fourth grade.
All areas of the program were observed. These areas observed consisted of classroom observations and activities, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review.

Room observations/activities: This center offers traditional full-time daycare along with the option of pre-school programing for ages 2-5. There are 10 classrooms and include two additional experience rooms which are designed to offer other opportunities to learn through play and to use imaginations. There is also an indoor gym for large motor play. The Bright Wheel application is used to communicate with parents. Play centers offered a variety of age/developmentally appropriate toys . Staff were in ratio. Staff maintained good structure in the rooms and were responsive to the children. Good handwashing technique was observed with both children and staff. There was discussion regarding the need to have deep cleaning on changing tables due to several having visible debris under the changing mats to maintain good germ/disease suppression/prevention.

Nutrition Practices: This center has dedicated kitchen staff and an on-site kitchen that was very tidy and organized with menus posted. Menus are in-line with CACFP guidelines. Menus are crafted by the cook and director; rotating seasonally. Meals are prepared in the kitchen and served family style in the classrooms by staff.

Health and Safety: Medication is stored in classrooms, securely and only accessible by staff. There are first aid kits in each room. Emergency/disaster plans were posted. Fire/Tornado drills were documented to have been completed monthly. Radon testing had been sent and was pending when this visit took place. Ashley Johnson provided email confirmation that the test results were received 11/9/23 and all rooms under the 4.0 cutoff. Heating and Cooling was checked for seasonal inspection 9/2024. There are two carbon monoxide detectors in the center.

Transportation: This center provides transportation for field trips and before/after school with vans (15-passenger) or contracts with a church to utilize church buses and a professional driver.

Playground-There is an indoor playground that was in use and in good condition. The outdoor playground is enclosed with composite privacy fencing; surfaced with wood chips. There are small play structures and the center has secured additional play structures which they are fundraising to secure the funding necessary for moving the equipment and reassembly.

Administrative Review: Information for mandatory reporter, consultant contact, handbook accessibility, license, fire/tornado plans and non-smoking signs are posted. Ten child files were reviewed, containing all required information. Six Employee files were reviewed and all contained the necessary information. This center has a well-established policy that is often reviewed/updated as needed by the co-owners who are also the co-directors.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

This center has attained a quality rating in IQ4K Level 3.

The owners/directors have a strong background in the field of education and work well together.

The staff is composed of licensed and experienced teachers who also share the director's vision of early childhood education.

The center has a strong core of staff that have been with the center since the center opened.

The center has a secure entrance.

The children who attend preschool at this center are ready and prepared for Kindergarten.

Enrollment remains high and steady, there is a wait-list for some ages.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.11(3)a: Center shall ensure that: Facility and premises are sanitary, safe, and hazard free. Adequate indoor and outdoor space is provided. The outdoor area shall include safe play equipment and area of shade. Sufficient space provided for dining. Sufficient lighting shall be provided. Sufficient ventilation. Sufficient heating. sufficient cooling. Sufficient bathroom and diapering facilities. Equipment, including kitchen appliances, are maintained so as not to result in burns, shock, or injury to children. Sanitation and safety procedures for the center are developed and implemented to reduce risk or injury or harm to children and reduce transmission of disease.

Discussion took place with reminders about deep cleaning the changing tables to include under the mats on the changing table as several had visible debris under the mats. This will help keep with disease/germ suppression.

V. SPECIAL NOTES/RECOMMENDATIONS:

A new two year full license is recommended.

Teachers were consistently observed to be engaged in leading classroom activities and/or responding to the children in their care; along with demonstrating good handwashing habits.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
