General				68	68
Summer					0

1. Basic Overview

An unannounced licensing visit was made to Impact After School Care (ASC) on 1/21/26. The center opened on 2/11/14. Services are offered to children in kindergarten to sixth grade, Monday through Friday, before school 6:30 AM to 8:00 AM, after school 3:30 PM to 5:45 PM, early out days, and full days during the summer. The program is located in Zion Congregational Church located at 103 E. Main St, Treynor, Iowa. There are 53 children enrolled. Jordan Campbell is the director. He has a Bachelor of Arts Degree and child development related experience. I met with Jordan during my visit.

Observation of rooms:
The center utilizes a large room that is connected to the kitchen area of the church. There are a fun variety of age and developmentally appropriate toys and equipment. The program uses a variety of resources for their religious based curriculum. One of the curriculum resources is called The Big Picture Interactive Bible Story Book for activities and bible verses and stories. The daily schedule and lesson plans are posted. The program has homework time, and rotates games, toys, and crafts frequently. Jordan provides an annual newsletter and a newsletter for the summer program. The center was in ratio. The children arrived from school, washed their hands, then began playing. There are a variety of toys indoors. Half of the room is for active play and the other half of the room is for sit-down play. The center uses the Brightwheel child care app. The center added an additional room to its programming area. The new space will have a capacity of 25 for a total of 68.

Nutrition:
The center provides breakfast and an afternoon snack each day. For full day programming, the children bring their lunch and it is stored in the refrigerator. Food was properly sealed. There are thermometers in the refrigerator and freezer. The center doesn't participate in the federal food program. You must follow the CACFP guidelines even if you aren't on the federal

food program. Please refer the CACFP food program guidelines to ensure you are serving credible snack food items. Please post menus.

Health and safety:
Medication management procedures are followed when a child is prescribed medication. The fuel burning inspection was completed on 12/4/25 and was in good working order. A radon mitigation system was installed in December 2019. Radon testing was done in March 2025 with a score of 3.3 pCi/L. Radon testing is due every two years to make sure the mitigation system is working properly. Fire and tornado drills are practiced and documented on a monthly basis. The center has first aid kits. The center has a carbon monoxide detector. Purell Surface is used for sanitizing. Please make sure to follow the correct sanitizing procedures and use the three-step bottle procedure 1. Soap/water for cleaning, 2. Water for rinsing, 3. Your EPA and child care approved product for sanitizing and disinfecting. Please use three separate spray bottles for the three steps.

Playground:
The playground area has a pavilion with electricity. This provides a shaded area. Grants have been received for playground renovations. They have shade tarps. The playground has tetherball, a basketball court, a gaga ball pit, and wiffleball. The playground is open to the community. Playground mulch is used for surfacing.

Transportation:
No transportation services are offered at this time. The school bus transports the children from the program to school and to the program after school each day. The center takes walking field trips to the library.

Administrative records:
Five children's files were read. None had permission to secure emergency care in case of an accident or illness. One file did not have phone numbers for the doctor or dentist and listed the parents/guardians as the only people allowed to pick up the child. Please review all child files and have them updated as required. Three staff files were reviewed and were in good order. One was missing the annual staff training hours. Jordan maintains daily contact with the staff through Brightwheel.

2. Identify Observed Strengths of the program

Jordan works very hard to provide a fun program for the children. The staff had excellent interactions with the children. The program is an excellent resource for the community. The center receives grants. An additional room is being added for programming purposes.

3. Identify the aspects that fall below the standard

109.7(2): Three staff files were reviewed. One was missing the six annual training hours.

109.9(2)d: Five children's files were read. None had permission to secure emergency care in case of an accident or illness. One file did not have phone numbers for the doctor or dentist and listed the parents/guardians as the only people allowed to pick up the child.

109.11(3)a: The center was not following the correct sanitizing procedures and were not using the three-step bottle procedure 1. Soap/water for cleaning, 2. Water for rinsing, 3. Your EPA and child care approved product for sanitizing.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/Recommendations

A full license is recommended for 2/1/26 to 2/1/28.

CHILD CARE CENTER ANNUAL EVALUATION

On 1/21/26, an additional programming room was added. This brings the total capacity to 68.

Date: 01/27/2026

HHS Licensing Consultant: Tausha Bottorff

Non-compliance with any of the mandated regulatory requirements listed above may lead to the cancellation or revocation of your Child Care License. Please take steps necessary to completely address each of the violations noted above.

Child Care Resource and Referral is an excellent resource for providers to access training options and support in your area. You can reach Child Care Resource and Referral at **https://iowaccrr.org**.
