CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Cayla Crowner has been a registered child development home provider since approximately 2016. Cayla changed to a category C2, to include her husband, Steven, as her co-provider, in April 2025. Cayla stated that she prefers to take infants and preschool age children versus school age children, stating that it is difficult to provide activities for school aged children when also caring for infants. Both of Cayla and Steven's children attend their daycare, but their oldest child is school-aged and does not count in her ratio numbers. Cayla said that having her husband as a co-provider has been beneficial, they are able to provide care for more children, and they divide up the responsibilities to meet the needs of all of the children. Cayla said that she provides parents daily updates when they pick up their children and she also has a closed Face Book page to keep families up to date with pictures.

2. Identify Observed Strengths Of The Program

Cayla came from the backyard to greet this worker and notify me that they were all out back playing. This worker accompanied Cayla to the backyard, which is fenced in, to complete the compliance visit. Cayla and her husband/co-provider, Steven, were caring for 11 children. This worker observed Steven playing a game in the yard with several children, an infant swinging in a baby swing and the rest of the children playing on/around a swing set. Cayla and this worker completed much of the compliance visit outside so she could help supervise the children playing while completing the compliance check list. Cayla said that they are having the children play outside in the morning when there is shade in the yard and before the temperatures get too high. The family's dog, Annie, was also outside with the children. Annie was observed to be a very patient and tolerant dog with all of the children running around and playing.

3. Identify The Aspects That Fall Below The Standard

The provider was found to be in full compliance with all rules and regulations.

The inside of the home was observed to be quite cluttered. Cayla stated that her mother-in-law, who lived with them, recently passed away. Cayla and Steven are working on turning the lower level, which was formerly occupied by Steven's mother, into a daycare space.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

N/A

5. Special Notes/recommendations

This worker would recommend decluttering and organizing in the inside area of the home so there is more space for the children to play.
