CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Becky Hagen has been providing childcare services for over 40 years. She currently has one full time preschool aged child and two additional school aged children. The youngest child in care was present for the visit to the home and was playing with building blocks. The provider discussed that they have a general routine that they keep during the day. This will modify soon when school ends. The provider has multiple toy options for children in her care. She also has games and puzzles for the children to keep active. They will start spending more time outdoors as the weather cooperates. She discussed going to the library for book time and other activities that they will have coming up over the summer.

2. Identify Observed Strengths Of The Program

The provider has a very calm demeanor. The child freely got her attention and asked for help when needed. With a smaller number of children in care, the provider can give the one to one attention that children need.

The provider is very personable and has strong connections to the children in her care and the family that she works with.

The home is clean and organized and always ready for children to play.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
