CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Teena Hash has provided childcare services for over 26 years. She does have one substitute who can cover for her when she has appointments. She also has three assistants to help her when school is not in session. Some of the children were napping and others were playing outside when compliance staff arrived. The childcare uses the entire main floor of the home. The provider talked about her rotation of toys and activities for the children. The provider reported that she normally has 12 children in care, but there are only 10 in care on this date. She reported that while there is a general schedule for the childcare, most of the day is free play.

2. Identify Observed Strengths Of The Program

Compliance observed the provider maintaining supervision of the children and assistants inside and outside of the home.

The provider reported her strengths include making the childcare feel like home for the children. She reported they all become like family and she wants children and parents to feel comfortable leaving the children in her care. The days in care are mostly child led free play times. There are activity options for the children inside and outside. With the warmer weather, they like to be outside as much as possible.

The provider reported that she likes to keep consistency between the child's home and childcare environments. She will work with parents on disciplinary measures and do the same things the parents are working on at home.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
