	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Nate Knepper **Date:** 01-19-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A.

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

A licensing visit was conducted on 1/19/23. The on-site supervisor was present throughout this visit.

All areas of the program were observed with the exception of the playground, which like last year, could only be partially observed due to the snowstorm that occurred within the past 24 hours. These areas observed consisted of classroom observations and activities, ratios, nutritional practices, health and safety practices, playground observation (monthly playground inspections were observed), field trip and transportation practices, and administrative review. The most recent COVID updates were also reviewed.

This is one of five Kids Connection programs in the Johnston area. Children who attend this school attend this program. The program is open year round. During the school year, children can attend 6:30 am - 8:30 am and/or 3:35 pm - 6:00 pm except for Wednesdays, which are early out days. During the summer months and no school days, children attend 6:30 am - 6:00 pm. The program uses their own learning curriculum in their teachings.

Steve Conlan is the director of this program and the other five Kids Connection programs. Steve has a BS degree in Elementary Education and Specialized Social Studies. He has worked for Kids Connection for a number of years. Tara McCulley is the on-site supervisor at this program. Tara has a BA degree in Psychology and Family Services and has past experience working with children, including the Kids Connection programs. Tara has also been an on-site supervisor at another Kids Connection program. Both individuals meet the qualifications for their positions.

This program uses the school cafeteria, 2 gyms, and music room. All areas are in close proximity with each other. At the end of the school day, staff go to the specific school hallways to get the children who attend child care and take attendance. Children are divided up by age between the gyms, cafeteria, and music room. Children then rotate between the rooms and for snack. After all snacks are done, children are mixed together and can use the gyms, cafeteria, or music room. There are designated staff who remain in the hallways to ensure supervision of the children who move between rooms or use the restroom with permission.

During the visit, some children were in the music room watching a movie or reading books. Other children were in the smaller gym playing what looked to be dodgeball. Staff were interacting with children. A couple of children needed ice packs during the visit and staff provided care to these children. Accident reports would also be completed.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

The center has a strong working relationship with the school and school personnel. The center receives support from school administration as well.

The center is able to use several rooms in the school for programming space.

This center is one of five Kids Connection centers in Johnston. All five centers have the same director, policies, handbooks,

and structure; giving continuity and consistency among the different sites.

This center, as well as the other five sites, are trained in PBIS. They also incorporate STEM into the program.

The director of these programs has quarterly meetings with directors of other school district before and after school programs. In addition, on-site supervisors of these five programs meet with the director for meetings every other week. Then individual centers have all staff meetings monthly.

The center sends out a monthly newsletter and has a website.

The center conducts parent surveys twice a year.

The center has a good team of staff who are engaged with the children and take initiative. There is a good mix of tenured and new staff at this site.

The program conducts social events for staff and team building events. Staff are recognized on their birthday with treats.

Again during the visit this year, staff were observed to be engaged with the children in a positive manner. Staff were actively playing with children both in small group and individual activities, as well as large group activities.

Staff were attentive to the children who needed ice packs.

Enrollment has increased within the past year indicating a need in the community.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

For the second year in a row, no below standards were identified at the visit.

V. SPECIAL NOTES/RECOMMENDATIONS:

The center is exempt from environmental testing as they are located within a school and only serve school-age children.

Field trips are taken year-round. The center contracts with the school for a bus and driver.

I-Power was discussed at the visit.

Staff files were not reviewed at this visit in part because the director was not present and there was a school band event that would be starting soon on this day. Several staff files for this program will be reviewed when another one of the Kids Connection programs comes due for their visit in the near future.

A new, full, two-year license is recommended.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
