- [X] PreSchool
- [X] School Age
- [ ] All Ages

LICENSE CAPACITY	Infants	2 Years	Preschool	School-Aged	Capacity
General			49		49
Summer					0

1. Basic Overview

Unannounced licensing visits were made to Mother Goose Child Care & Preschool Sites II and III on 12/11/25 and 12/16/25. I met with Jackie Watts during my visit. The center provides care for toddlers and preschool age children from 6:00 AM to 6:00 PM Monday through Friday. The school age programming is being held before and after school at Site II. It is held across the street at Mother Goose Site III when there is programming all day. Jackie said the school age children are in the Mother Goose Site II building to eat lunch and other activities at times. Robert and Ardith Caputo are the owners and directors of the center. Ardith received an Associate's Degree in Child Development- Business in 1968. Jackie Watts is the on-site supervisor. It is located across the street from Mother Goose Site III which provides care for infants/toddlers and school age children. The center is located in a residential neighborhood. There are 15 children enrolled in the center. Bob and Ardith Caputo celebrated fifty-five years in child care in February 2022. They opened their first child care center on the farm in February 1967. This is an amazing accomplishment.

Observation of rooms:
There are three program areas. The two rooms upstairs are the art room and another room that is used for a variety of activities and nap time. The room downstairs is used for activity centers and is where the children eat. I observed the children playing and getting ready to go downstairs for lunch. Bob, Jackie, and Gabe had excellent interactions with the children. They were nurturing and attentive to the needs of the children. Lesson plans/activities were not completed. Please make sure to have complete lesson plans for the children. The center was not in ratio based on age groups. I provided Jackie with a list of guidelines for the age groups they serve on 12/16/25. The art room upstairs was very cluttered and had art supplies accessible to the children. This is a health and safety hazard. Please clean the art room and put all supplies out of reach of the children.

Nutrition:
The center provides breakfast, lunch, and two snacks. Jackie prepares the meals. Menus were posted. Even though you aren't on the federal food program, you must follow the CACFP guidelines. Please refer to their website for food requirements. Proper food storage was not observed. Please make sure to put all food in airtight containers after opening. On the date of my visit, there were chips that were not sealed.

Health and safety:
Monthly fire and tornado drills are practiced and documented. The annual fuel burning inspection was completed on 11/22/25. Radon testing was done in 2025 and was in the acceptable range. Radon testing is due every five years if the results are below 4.0 pCi/L. Jackie reports they follow the proper medication procedures if a child is prescribed medication. There continues to be confusion about how much bleach/water to use for sanitizing and disinfecting. Jackie reports she mixes the bleach water for both sites on a daily basis. One bottle that is not a 1-gallon bottle said 1/3 Cup bleach to 1 gallon water. The bleach/water bottles for sanitizing and disinfecting must be mixed correctly and mixed daily. Please

CHILD CARE CENTER ANNUAL EVALUATION

use the three-step bottle procedure for sanitizing and disinfecting - 1. Soap/water for cleaning, 2. Water for rinsing, and 3. If you are using bleach/water make sure the bleach is EPA approved and you must follow the mixing directions on your specific bottle of bleach/website. Incorrect sanitizing and disinfecting have been a violation every year since 2019. Jackie and staff have been trained in sanitizing and disinfecting several times and have been referred to their specific bottle of bleach for proper mixing instructions. It is very concerning that this has continued to be a violation since 2019. You may want to consider using something that does not require mixing. Please keep the bottles out of reach of the children. Please discuss other sanitizing/disinfecting products with your child care nurse consultant.

Playground:
Bob had previously reported that the wooden structure playground piece of equipment isn't used and will be removed. As of my visit on 12/11/25, much of the wood structure had been removed. A new playground has not yet been installed. They only use the cement area. The playground area is fenced. Please refer to the Public Playground Safety Handbook for specific information. Playground inspections have not been completed. The playground inspection form was sent to Jackie on 12/11/25.

Transportation:
The center has a van that provides transportation to some local schools. The van is used for transportation for field trips. Make sure you keep a log of repairs and make sure you have a checklist/children's name that is used for when children enter the van, are dropped off and picked up from school, and when they exit the van returning to the center. Please check the van seats after each transition.

Administrative records:
Jackie has NAC accreditation. Staff files were read and national record checks need completed. Jackie said the national record checks/fingerprinting were completed in September 2024 and they never receive the results. She said they didn't follow up to see why the record checks results weren't returned or if they were ever received. National record checks expired in 2023. Jackie reported that Brenda from Child Care Resource and Referral will be coming on 12/19/25 to complete the fingerprinting and said they would send in the fingerprints right away. All four staff have current state record checks. One record check needs an evaluation. Please complete the transgression evaluation and email me the form that gives permission for the staff to work at the center once it’s received. Please send me an email letting me know when you receive the national criminal record checks.

Seven child files were read between both sites. Four files were missing the annual physical or annual statement of health form signed by the parents. Children who are not yet enrolled in kindergarten are required to have an annual physical. Children enrolled in kindergarten and above may have an annual statement of health form signed by the parent. I emailed a copy of the statement of health to Jackie on 12/11/25. Three files were missing the name and/or number of the dentist. One was missing their current immunization record. Please review all child files and have them updated with the required information immediately. The staff and child file forms that state what is needed in the files were emailed to the center, Bob, and Jackie on 12/17/25. It has been sent to them in previous years as well.

Make sure you have read and are knowledgeable of the Child Care Centers and Preschools Licensing Standards and Procedures Handbook. I emailed a copy of the current handbook to the center, Bob, and Jackie on 12/17/25.

2. Identify Observed Strengths of the program

Staff are proud of the center and the care they provide. Staff are helpful during my licensing visits. The staff have amazing longevity of working at the center. Jackie has more than 30 years, Bob and Ardith have more than 50 years, Angie has over 18 years, and Gabe has worked at the center for nine years. Staff have excellent interactions with the children. Jackie and Bob have received services from Child Care Resource and Referral in the past. Jackie reported that the center received a grant and new equipment will be ordered. Mother Goose Site II will be remodeling the girl’s bathroom. They will continue to work on installing a new playground. The center provides transportation to and from three elementary schools in the area.

3. Identify the aspects that fall below the standard

109.6(4)d: National record checks expired in 2023. National record checks are due every four years. CCR&R rolled fingerprints for three staff members on 12/19/25. One staff member still needs to have his prints rolled. Any staff member

who has a criminal charge is required to have a transgression evaluation. Please submit a transgression evaluation for the staff member that has the criminal charge.

109.7(2): Three staff members are missing required training and physical exams. Two staff members are missing physical exams which are required every three years. Two staff members are missing mandatory child abuse training which is required every three years. One is missing Universal Precautions which is required annually. One is missing the annual six hours of personal development training. Please review all files and make sure they have all necessary information.

109.8(2): The center was not following the age guidelines. They had two-year-old children combined with four-year-old children which is not allowed.

109.9(2)i: Children who are under kindergarten age are required to have an annual physical. Children who are in kindergarten or above are required to have an annual statement of health signed by the parents. Seven children's files were reviewed for both sites I and II and four were missing current physicals or statements of health. Three were missing the name and/or number for a dentist and one was missing their current immunizations record.

109.11(3)a: There continues to be concerns the bleach/water is not being mixed properly. This has been an ongoing issue for years. The art room is very cluttered and has art supplies that are accessible to the children making it a health and safety hazard.

109.12(1): The lesson plans were not complete. Lesson plans are required for all ages. Centers must develop activity plans for all age groups.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/Recommendations

A full license is recommended for 10/1/25 to 10/1/27.

Please send me an email by 1/31/26 letting me know how the noncompliance items have been corrected.

A referral to Child Care Resource and Referral was made; however, I received information that the center is not willing to work with CCR&R. If these areas are not improved by my visit in approximately three months, additional steps will be taken. I highly recommend working with CCR&R and the Child Care Nurse Consultant.

Date: 12/19/2025

HHS Licensing Consultant: Tausha Bottorff

Non-compliance with any of the mandated regulatory requirements listed above may lead to the cancellation or revocation of your Child Care License. Please take steps necessary to completely address each of the violations noted above.

Child Care Resource and Referral is an excellent resource for providers to access training options and support in your area. You can reach Child Care Resource and Referral at **https://iowaccrr.org**.
