Program Population Served:

- [ ] Infant(0<24 mos)
- [ ] Toddler
- [ ] PreSchool
- [ ] School Age
- [X] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Tammy McRoberts has been providing childcare services since February 1997. She reported that she can have up to eight children in care on some days. Today at the visit, the provider had four children in care. They were playing with toys in the living room area of the home. The childcare is located on the main floor of the home. The living room, kitchen area and two bedrooms are used for childcare space. The provider reported that they have a general schedule throughout the day. The children have free play when they are inside and there are times they will go out to the back yard for outdoor play. The back yard has a newer play set for the children to climb. The provider reported that she will alternate toys in and out every two months to keep things new and fun for the children. Some of the reported favorite items are dolls, dress up items, and trucks.

2. Identify Observed Strengths Of The Program

Compliance staff observed the interactions between the provider and children. There are no concerns as the children easily approach the provider for needs or wants. The provider talks to the children and will help them find an activity if necessary.

The provider reported that she meets with families and children before the child starts in care. She likes to get to know the child a little. She will have a new family come when other children are present to see how the new child might interact with current children. She reported that the families she works with become like part of her own family. This is important for communication and overall care of the child.

3. Identify The Aspects That Fall Below The Standard

110.8 (4) b : Procedures are in place for: Evacuation to safely leave the facility, Relocation to a common, safe location after evacuation, Shelter-in-place to take immediate shelter where the child is when it is unsafe to leave that location due to the emergent issue, Lock down to protect children and providers from an external situation, Communication and reunification with families, Continuity of operations, and Procedures to address the needs of individual children, including those with functional or access needs.

**The provider was unable to locate the emergency preparedness plan in her paperwork. A copy will be mailed with this letter and the provider will need to fill out the form and can send pictures of the completed form to 712-435-0576 by August 19, 2026.

110.9 (4) e : For infants and preschoolers: A statement of health signed by a physician submitted annually.

While checking three child files, the provider is in need of updated child physical information. The provider can work with the parents to obtain an updated physical and immunization records for children in her care. These files will be reviewed at the next compliance visit.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

The 2026 targeted compliance measure was not met at the time of the inspection.
