- [ ] Non Registered Child Care Homes accepting CCA

Program Population Served:

- [ ] Infant(0<24 mos)
- [ ] Toddler
- [ ] PreSchool
- [ ] School Age
- [X] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Shelby Liddick has been registered with the State for 3 years. Prior to registration, she watched children in her home for a while. She also worked at a childcare center for a few years. When compliance staff arrived at the home, the provider had three children who were finishing up their snack. Several other children were playing with different toys in the living room area of the home. When compliance staff counted there were 10 children in care. The provider reported having an exception to policy for an additional child a couple days per week. With school ending, schedules are off this week and she did have an older sibling in care that she would not normally have. She also reported that two children came later today and one child would be picked up soon. Compliance staff was in the home between 20 and 30 minutes before the extra child was picked up. The provider reported a day in daycare is full of play time. The program is mostly child-led play. They have time outside daily. The provider reported they have had an issue with an ill dog, so the children have been playing on the cement out front. She wants to make sure that the back yard is fully cleaned up before allowing the children to play there. The provider discussed the use of her home for childcare, the childcare is held on the main floor of the home. She also uses two bedroom spaces for nap times for the children.

2. Identify Observed Strengths Of The Program

Compliance staff observed the provider to be very engaged with all of the children. She sat on the floor and played with the children. Some would approach her and then move on to something else. The provider used redirection when necessary with the children. She would offer a different toy option for the children to bring to play with her.

The provider's lap remained full during the visit, if one kiddo got up to go play another took their place. There is some jealousy between the children at times for her attention. She was very patient and would ask one child to find something to do so another could get a few minutes with her.

The provider loves the children as if they are her own. They keep busy to help pass the day and she doesn't hear that they are bored very often.

3. Identify The Aspects That Fall Below The Standard

110.6 : No more children are in care than the number authorized on the registration certificate.

**Compliance staff discussed the numbers with the provider. She reported that she thought the cross-over time between the late drop off and the early pick up would not be as long. We discussed future plans if this situation would come up again. Work with the families to avoid the potential overlap and be over numbers.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
