CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Makayla Altschaffl has been providing childcare in her home for 6 years. Previous to this, she worked in other childcares as an assistant. The childcare is on the main level of the home. The children utilize the living room, kitchen and two bedroom areas. She is open from 7 am and reported everyone is usually gone by 5:30 pm. The provider rotates toys for the children to keep children entertained with "new" things every so often. The home has the appropriate signage and emergency routes posted for the children and families to see. The children told me where they go for tornado drills and fire practices.

2. Identify Observed Strengths Of The Program

The provider stated that the children become family and she cares for each of them as if they were related.

Observation between the provider and children was that they approached her easily and were not afraid to ask for help.

The provider is organized with her paperwork and is all up to date.

3. Identify The Aspects That Fall Below The Standard

The provider is in full compliance of regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

Also, discussion with the provider regarding the play room space. It is recommended to rotate larger items out of this room to allow for needed floor space for the children in care.
