General				32	32
Summer					0

1. Basic Overview

On 11/5/25 an unannounced visit was conducted at the school-age childcare program, which operates Monday through Friday from 3:00 PM to 6:00 PM. The program is open only on days when school is in session and serves children from Transitional Kindergarten through 6th grade. At the time of the visit, 9 children were present out of the 11 currently enrolled. The program is licensed for a maximum capacity of 32 children.

Todd Kenyan serves as the onsite supervisor and is also employed at the main childcare center and has many years of experience working with children. Children are dropped off daily by the school after dismissal.

Upon arrival, children were observed to be excited to see the staff, greeting them warmly and transitioning easily into the program. The environment was welcoming and engaging, with a variety of activity centers available. Children had access to puzzles, art supplies, beads, games, and other hands-on materials that encouraged creativity, fine motor skills, and social interaction. These centers were well-organized and developmentally appropriate for the age group served.

The program utilizes the Bright Wheel App for administrative tasks and communication with families. While the program is not currently enrolled in the Child and Adult Care Food Program (CACFP), it provides healthy snacks that align with CACFP nutritional guidelines.

Although the program does not have an onsite playground, staff may walk children to the main center or a nearby park if outdoor play is desired. Given the short duration of the program each day, outdoor play is considered optional. The program does not transport children or conduct field trips requiring transportation.
Health and safety practices were reviewed. The center does not administer medication, and a well-stocked first aid kit is

available for minor injuries. Monthly fire and tornado drills need to be completed and documented.

Because the program does not serve preschool-aged children, radon testing and annual heating inspections are currently exempt.
The program has identified goals to increase enrollment, transition to the school site in 2026, and enroll in the IQ4K quality rating system. Staff were observed to have positive, nurturing interactions with the children and demonstrate strong relationships with both the children and their families. The program also collaborates with Child Care Resource & Referral (CCRR) for support and resources.

2. Identify Observed Strengths of the program

There is very positive interaction between staff and the children in their care.

Children were excited about activities of the day.

The center encourages positive behavior through a rewards program.

3. Identify the aspects that fall below the standard

109.10(6): Children's hand washing: Center shall ensure staff assist children in personal hygiene. Missing hand washing sign.

109.13(5)a: Sufficient refrigeration appropriate to perishable food is provided. Need thermomenters in fridge and freezer.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/Recommendations

It is recommended to continue working with CCRR for support.

Please provide a written response to the licensing consultant by 12/30/25 of items not meeting licensing standards.

A full license is recommended at this time.

At least one visit will be made to the center during the next year.

Date: 11/06/2025

HHS Licensing Consultant: Leann Steinhauer

CHILD CARE CENTER ANNUAL EVALUATION

Non-compliance with any of the mandated regulatory requirements listed above may lead to the cancellation or revocation of your Child Care License. Please take steps necessary to completely address each of the violations noted above.

Child Care Resource and Referral is an excellent resource for providers to access training options and support in your area. You can reach Child Care Resource and Referral at **https://iowaccrr.org**.
