Summer					0

QRS Rating: 2

RECOMMENDATION FOR LICENSE:	
X	**FULL** license from 10-01-2023 to 10-01-2025
	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Jill Seibert **Date:** 02-03-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

Mahaska County Head Start is located in a newly constructed building in Oskaloosa. The center occupies three classrooms in the building which also houses several classrooms of SWPP, and several rooms occupied by the Mahaska County YMCA Childcare (a DHS licensed program). The center is owned and operated by Southeast Iowa Economic Development Association (SIEDA) and provides three Head Start classes to preschool age children. This program was formerly located across town in the Mahaska Preschool Partnership building. The program director is Elizabeth Fairchild. Ms. Fairchild directs several other Head Start programs for SIEDA in southeast Iowa. Ms. Fairchild has been Director of this program for 7 years and is housed in the main SIEDA office in Ottumwa. The program has two On Site Supervisors. One On Site Supervisor is Angela Wilson. She has been employed with SIEDA since 2009. She was appointed last year as she is present daily. Kayla Emery is the other OSS appointed in 2022. She was formerly a Family Service Worker for Head Start. OSS Emery rotates between this site and other sites. Ms. Stacy Roethler was formerly an On Site Supervisor and is present in the building frequently. Ms. Roethler is the Family Service Worker for the building.

On 1/12/23 I made an unannounced off year visit to Mahaska County Head Start and met with Head Start Family Service Worker Stacy Roetheler and OSS Angela Wilson. All program areas were observed on this date. This visit consisted of classroom and building area review and observations of activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review.

Center Nutrition Practices Observed:

Meals are prepared by YMCA kitchen staff in the building in a commercial kitchen. The children may eat in the classrooms. In 2022 they will eat in a newly constructed cafeteria area. The kitchen area is across the hall from the cafeteria and contains newer equipment, sufficient storage for center food, and sufficient dish washing capacity to accommodate a program of this size. Posted menus indicate that minimum nutritional requirements are being met. The program is participating in the CACFP program. The center has a Nutrition Assistant as well. If children have food allergies the nutrition aide and cook and all staff supervising the child is aware.

Center Health and Safety:

The center administers prescription and non-prescription medication in accordance with licensing regulations, physician directions, and parental consent. The center currently has appropriate documentation for medication or children with allergies. We reviewed compliance with regulations regarding staff and child hand washing, storage and maintenance of a first aid kit, emergency plans and drills for fire and tornado, environmental testing and the maintenance of any necessary detection equipment, and general regulations regarding safety and sanitation policies and procedures.

Carbon monoxide detectors are not present but will be purchased soon or brought over from the former building. Radon testing results should be under a level of 4 pCi/L. Updated testing is due every 2 years. The program is now exempt from the possibility of chipping of lead based paint since it was constructed after 1978.

The square footage of the classrooms indicates 24 or 25 children may be in each room. However, Head Start is setting their own capacity at 60 children which is best practice and duly noted. The program is in compliance with rule stating there must be one restroom for every 15 children. All restrooms must have ventilation.

The program is secured by a locked door. Parents must ring a door bell and be buzzed in.

Director Elizabeth Fairchild and I had contact on 10/17/2019 regarding general ratio and supervision issues and how to best achieve these. Head Start is continuously working with staff regarding active and close supervision. Staff should know name and number of children assigned to them at all times and maintain direct supervision throughout the program day. The program is now serving three year old children in the new building. SWVPP is provided for 4 year old children by the school.

The program has access to a gross motor area down the hall from the classrooms. The area has attached restrooms.

The program has approximately 6 employees. All employees are over 18 years of age. This program is well established and has several employees with years of experience including Teresa Evans (a Head Start employee since 1996) and Alexis Bell (a HS employee since 2017).

Center Playground:

The center has a new fenced outdoor play area immediately beside the center. Surfacing beneath the equipment is adequate. The area features commercial climbing equipment. Shade is provided by the building and shade structures. The Child Care Weather Watch is utilized to assess whether outdoor play is appropriate due to questionable weather conditions. Emergency medication, emergency contacts and a first aid kit are taken outdoors with the children. The kits are inaccessible to children.

The program should perform monthly outdoor play area inspections.

Center Transportation Arrangements/Field Trips:

SIEDA contracts with 1015 a local transportation service. Walking field trips and any other field trips may be taken with parents signed authorizations updated annually. Groups may take walks around campus which is not considered a field trip. Emergency contacts, emergency medicatin and a first aid kit are taken on any trips/walks.

Center Administrative Records:

Child misbehavior is addressed by redirection, positive reinforcement of appropriate behavior. The center is in compliance with regulations regarding required notices and postings and required written policies provided to parents in the form of a parent handbook. Staff and child records were examined during the spring inspection in the former building.

Tamara Wheaton is the newly appointed Head Start Administrative Assistant, located in the main Head Start Office in Ottumwa. She does an excellent job of record keeping and provides DHS with staff requirements. She provided me with staff records on 2/2/23. Staff and child records are complete and well organized. Staff physicals are up to date. Universal Precautions and Mandatory Reporter training, SING checks, fingerprint checks (4 years) and professional development hours were reviewed. Emergency Preparedness training is due annually. A new plan needs to be written for the new location. Stacy R. thought one had been written but we were unable to find it the day of the visit.

Child files are stored in Child Plus. The family service worker ensures each file contains updated physicals and immunizations. The program is working with parents to ensure updated physicals are acquired. New enrollment packets were compiled in the fall for the 2022/2023 school year.

All required postings including Mandatory Reporter information, DHS License and DHS Licensing Consultant Information. No Smoking signage was also present. Communicable diseases are posted as they arise.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

The program is working in cooperation with other area agencies.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

1. 109.10(15)b: Emergency instructions, phone numbers, and diagrams for fire, tornado, and flood shall be visibly posted and documented at least once a month for fire and tornado. Records shall be maintained for current and previous year. Tornado and fire drills were missed a few months. Drills should resume immediately.

2. 109.11(3)d: Record of monthly inspections of outdoor recreation area and equipment shall be kept. Playground inspections were missed a few months. They should resume immediately.

3. 109.11(7)b: Centers at ground level that use basement area as program space, or have a basement beneath program space: Testing and plan for remedy of radon is conducted. I spoke with Family Service Worker Roetheler on 2/3/23 regarding radon testing. She assured me this would occur this month.

V. SPECIAL NOTES/RECOMMENDATIONS:

Last year the center added another classroom increasing total capacity to 60.

DHS encourages you to contact your local nurse consultant. Child Care Nurse Consultants work with child care and early education businesses. Businesses may call or send questions to a child care nurse consultant about health and safety policies, health programs, health of personnel, and specific child health or safety issues. Please visit the following website regarding health forms and postings and other services offered by IDPH Child Care Nurse Consultants: http://idph.iowa.gov/hcci/consultants This program has access to two consultants, CCNCs Crouse and Beach.

DHS encourages you to contact Child Care Resource and Referral Consultant Karen Lauer. They offer centers assistance with meeting the DHS regulations, QRS, infant/toddler concerns, room arrangement and environment, developmental concerns, Best Practice information, CDA assistance, or any questions or concerns you may have. The center is aware they may access CCNC and CCR&R Consultant on a consistent basis.

Based upon this review, it is recommended that this center remain in Full licensing status. The center is directed to correct violations in a timely manner, then continue to monitor day to day practice and adjust accordingly to continue to ensure licensing rule is met consistently. It is important to note, all DHS licensing standards and procedures must be maintained during the renewal period.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
