Findings:

This worker arrived at the home on 5/30/23 around 11:30am to find the children downstairs all sitting at the table having lunch. This worker was able to observe the children eating a well balanced meal to include protein, grain, fruit and vegetable. Alyssa had 8 children present and after reviewing the children's files she was found to be in compliance with the numbers and age ranges for category B.

A complete tour of the home was completed with the following noted:
- Alyssa provides primary care in the lower level so she did not have her outlets capped on the main level. However the children do have access to those when coming and going from the outside play area. She did agree to cap those accordingly
-The children might also on occasion use the bathroom on the main level and the bathroom cabinet was not secured and this worker did observe chemicals in that lower cabinet.
- The kitchen cabinet below the sink was not secured and also had chemicals. There was a latch on it but it just happened to not be secured at that time.
-Alyssa did not have emergency and disaster plans for fire and tornado posted by the secondary exit. She did have one posted accordingly but stated she did not realize she needed one for the secondary exit. She agreed to develop and post accordingly.

The outdoor area was observed with no hazards noted.

A full review of records noted the following:
-Alyssa needs to test her smoke detectors monthly and document accordingly.

In regards to the files for the children in care,
- Alyssa was missing a signed medical consent authorizing emergency treatment for one child.
- Alyssa was also missing one updated physical for one of the preschoolers.
All other kids files were maintained accordingly and they were organized.

Suggestions/Recommendations:

- Alyssa needs to cap all outlets on the main level of the home.
- Alyssa needs to either secure the cabinet in the main floor bathroom or move the chemicals.
- Alyssa needs to ensure the kitchen cabinet below the sink is secured at all times or move the chemicals accordingly.
-Alyssa did not have emergency and disaster plans for fire and tornado posted by the secondary exit and she agreed to do so.
-Alyssa needs to test her smoke detectors monthly and document accordingly.
- Alyssa agreed to obtain the missing items in the children's files to include a signed medical consent authorizing emergency treatment for one child and an updated physical for one of the preschoolers.

You may contact your local CCR&R for further assistance if needed.

Corrective Action Required:
