- [ ] School Age
- [X] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Lacey Calvert has been providing childcare for 13 years. She cares for all ages of children in her childcare. She had four children in care today at the time of the visit. Her hours are 7 am to 5 pm. Both floors of the home are utilized for childcare. The main floor has bedrooms for napping and they use the living room and kitchen area for part of the day. The basement has a walkout door that leads to a deck and the backyard for play. All children are always on one level during childcare time. They are either on the main level of the home or in the basement area. During the day, the children have free play most of the time. There are toys and activities on each floor of the home. There are times that the provider will have specific activities for the children to do.

2. Identify Observed Strengths Of The Program

Compliance staff was able to observe the provider with two preschool aged children. There were two younger children who were napping. We played follow the leader down the stairs to inspect the basement play area. The two children actively engaged in magnet blocks and worked to build tall towers.

Compliance observed the provider speak with the children and she was available to them at all times. We talked about discipline and the provider reported that she utilizes redirection. If a behavior continues after redirection attempts, the child would be given quiet time away from other children. She will then talk with the children about the incident and they return to play.

3. Identify The Aspects That Fall Below The Standard

110.8 (3) a : All medicines and poisonous, toxic, or otherwise unsafe materials are secured from access by a child.

**While we were walking through the kitchen, compliance staff saw medication on the counter. Discussion with the provider to maintain any medications on a high shelf or in a cupboard out of the reach of children.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

We talked about the language for the infectious disease information to add to your handbook.
Provider has procedures related to infectious disease and handling of bodily fluids including blood. Soiled diapers are stored in containers separate from other waste.
