CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Alisa Ashby has been providing childcare for 10 years. There were six children at the visit today. There were different toys out in the living room for the children to play with. Ages today ranged from an infant to a child who will be starting kindergarten soon. The provider reported this is about her normal number, there was at least one child not present today.

2. Identify Observed Strengths Of The Program

The provider allows the children to lead activities through play. If they want to get another box of toys out, they are to pick up the first box. She reported that this goes ok, most of the time. During the compliance visit observation was used between the provider and children. The provider was attentive to the children's needs while speaking with compliance staff. The provider easily found her paperwork and shared required forms with compliance staff.

3. Identify The Aspects That Fall Below The Standard

N/A

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

N/A

5. Special Notes/recommendations

The provider reports that she utilizes CCR&R all the time. Compliance staff discussed safe sleep, emergency preparedness planning, and new immunization exemption information that the provider should share with families.
