	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Jana Drew **Date:** 04-30-2024

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

Visited Stella Sanford Child Development Center on 04-10-24 and spoke with Danielle Haas, director. Danielle Haas, became Director (in May 2022) and has her associates degree in Early Childhood and 7 years of experience in childcare. DanIelle is the director and oversees 3 other Crittenton Center childcare programs. The center consists of a 2 year old room, 3 year old room, a preschool room and a kitchen. Children do not have access to the kitchen. Meals are obtained through the Sioux City School District. The daycare is owned by the Crittenton Center. Currently there are 47 children enrolled. The center operates year round Monday through Friday 6:30am to 5:15pm. The center serves children ages 2 years to Kindergarten. The front door is locked and staff admit everyone into the building. The center has been opened since 1992.

There are 47 children enrolled in the program. At the time of the visit there were 33 children present. The center continues cleaning toys that children use. The Center also has a cleaning crew that comes in the evening to do the major cleaning. All areas of the program were observed. These areas observed consisted of classroom observations and activities, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review.

Staff files were viewed with some information at the center and other information at the corporate office. When viewing ongoing staff trainings they were missing. Center is working on streamlining staff files.

The center follows the CACFP guidelines for nutrition. The kitchen is not accessible to the children. All meals are provided by the Sioux City Community School District and prepared onsite. The center participates in the CACFP program. Menus were posted.

Medication is stored in a lock box or out of reach of the children. Center follows proper guidelines for administering medication. Observed good hand washing procedures by staff. First aid kits are available and able to treat minor injuries. Fire/tornado drills were documented each month. Radon test continues to be high and needs to be retested. Radon mitigatory has been contacted. The last time radon was high and was tested in June 2023. Annual heating inspection was not available at the time of the visit. Good sanitary procedures are followed. Carbon monoxide detector is in each classroom.

A fenced in playground is adjacent to the building. Surfacing material around all climbing equipment. Surfacing material (ground-up rubber) is around all the playground equipment. The playground has slides, climbing equipment, a large sandbox, basketball hoop, teeter totter, various toys and kitchen. Shade is available on the playground. Monthly playground inspection is complete. The asphalt area of the playground has several areas where it is buckling and now a tripping hazard. The center has applied for a grant to resurface the whole playground and will be fixed yet this spring. Also there was a two year old on the slide which is not age appropriate and should not be on slide.

Center Transportation Arrangements/Field Trips
They walk for field trips or take the city bus.

Goals for the center: Update the playgrounds surfacing. The center has put cameras outside the building and will look at putting them in classrooms. To complete the IQ4K application which they are almost done.

The center has a good core group who are willing to help and support each other. The staff also have a good relationship with the children they serve. The program uses the Procare app. for families to check children in electronically, for billing, and for the center to communicate with families.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

Toys are at children's level and accessible.

Center displays children's art work in the rooms.

NAEYC accredited.

Good room arrangement throughout the center.

Center sends home a newsletter each month to keep parents aware of what is going on in the program.

Center has staff who have been with them for more than 2 years.

Center preschool is part of the preschool initiative program. The center also uses the GOLD assessments.

Very positive interaction with the children.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.9(1)e: All files contain documentation to indicate that ongoing staff training requirements are met, including current certifications in first aid/CPR and mandatory child abuse training.
Number not in compliance: 8

109.11(3)a: Center shall ensure that: Facility and premises are sanitary, safe, and hazard free. Adequate indoor and outdoor space is provided.
The surfacing on the playground needs to be fixed as there are several tripping areas. Also, the slide is to high for 2 year olds to be on without close supervision.

109.11(7)b
Centers at ground level that use basement area as program space, or have a basement beneath program space: Testing and plan for remedy of radon is conducted.

109.11(7)c: All centers: Annual inspection prior to heating season of all fuel-burning appliances to reduce risk of carbon monoxide poisoning and shall install one carbon monoxide detector on each floor that conforms to UL Standard 2034.

V. SPECIAL NOTES/RECOMMENDATIONS:

Center needs to email licensing consultant by 05-26-24 confirming they have corrected those those aspects cited as not meeting licensing standards.

A full license will remain in effect at this time.

At least one visit will be made to the center during the next year.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
