- [ ] School Age
- [X] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Donna Maddocks has been a childcare provider in Iowa for 22 years. She also had been a provider for five years prior to moving to Iowa. Amy Nielsen is the co-provider in this childcare. She has worked with Donna for six years in the childcare setting. The childcare is a level 1 IQ4K childcare. Donna reported that they are working on their renewal to continue on the rating system. The providers do have two substitutes they can use to continue operations of the childcare. The childcare is open from 6 am to 6 pm. They currently have a total of 7 children in care. During the day this number will fluctuate with school aged children before and after school and also preschool aged children who leave and then return from pre-school. The childcare home is all one level and the entire home is used for childcare.

2. Identify Observed Strengths Of The Program

Both providers are involved in the active care of the children in the childcare. Observations between the children and care providers showed that the children easily approach either provider. The providers speak calmly to the children when addressing needs or redirection.

The providers are normally the two individuals with the children and this offers stability and continuity for the children in care.

The childcare promotes learning through play-based activities. Most of the time is free play for the children with a few structured activities throughout the year.

The children are outside daily as the weather and temperature allows.

3. Identify The Aspects That Fall Below The Standard

The childcare is in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

Please add the infectious disease information to your handbook. This needs to address handling of bodily fluids like blood and vomit, along with soiled diapers to be placed in a different trash receptacle not accessible to children in care.

Please remember that you and others Mandatory reporter training will expire in May 2026.
