CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Jamie Frost has been providing childcare services in the Norwalk area for nearly 15 years. Her current enrollment is full with eight children. She has two infants in care and the other ages range to 5 years old. The provider uses the main floor and basement areas for the childcare. She has separated some of the children to provide a better sleeping arrangement for them. They have a good sized yard for outdoor play. They are stuck inside today with the rain. There is a playroom full of toy options for the children in care.

2. Identify Observed Strengths Of The Program

Compliance staff was able to observe the provider with the children in care. The provider was attentive to the needs of the children during compliance visit. The provider has an easy going personality and talks with the children to assess their needs.

The provider has worked hard to organize her files for compliance staff. This was not a request, but the provider did get all of her paperwork in a binder which is easier for her as well to keep track of the information from the families that she works with.

3. Identify The Aspects That Fall Below The Standard

Child files:
110.9 (4) g : A signed and dated immunization certificate provided by the state Department of Public Health.

**While looking through a few child files, one file did not have an immunization record. Discussed with the provider to work with the family to obtain that information. This will be reviewed at your next compliance visit.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

Compliance staff discussed safe sleep, emergency preparedness planning and shared legislative updates that were new July 1, 2025.
