Program Population Served:

- [ ] Infant(0<24 mos)
- [ ] Toddler
- [ ] PreSchool
- [ ] School Age
- [X] All Ages

## CHILD CARE ANNUAL EVALUATION

**1. Basic Overview**

Alyssa Palmitier is the childcare provider for Olive Street Child Care. The provider had been a registered A home and now is a registered B home. She is ready to accept more families in to her care with the category change. Prior to having her own business, the provider was a co-provider for a home childcare in a different city and she has experience working in childcare centers. The provider's current hours are 7 am to 5 pm. Today during the visit, there were three children in care. The childcare area is located on the main level of the home. There is a living room, dining room, and a bedroom area that create a lot of space for children to play. The provider has multiple toy options for play time. While the day is mostly free play at childcare, there are times she will have activities for the children. The provider will get the children outside when the weather is cooperative for at least 30 minutes a day. There is a large fenced in backyard for running and playing. The home has all necessary signage for emergency routes and phone numbers. The provider also has items ready for emergency preparedness.

**2. Identify Observed Strengths Of The Program**

The provider was active with the children during the visit. She has started to get their lunch ready as two of the children would be leaving for pre-school. She multi tasked getting food and the children ready to leave. The provider has a calm speaking voice with the children. She reported she has one kiddo that struggles with eating, and compliance observed her to gently encourage the child to take small bites.

The provider is looking forward to working with new families now that her numbers have increased for care.

**3. Identify The Aspects That Fall Below The Standard**

The provider was found to be in full compliance with regulatory standards.

**4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance**

**5. Special Notes/recommendations**

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

Please double check your policies to ensure that you have the infectious disease policy. The wording for this includes how you separate blood and soiled diapers from regular trash.
