Findings:

Findings:
This worker arrived at the home on 5/30/23 around 7:00am. Pam had seven child care children present plus her granddaughter. She was observed to be in compliance with her numbers and age ranges allowed for a Category B provider. . She was in compliance with her numbers and age ranges for category B.

A complete tour of the home was completed with the following noted:
- When the worker went downstairs to check out that level of the home and observe the furnace and water heater as well as the tornado area, this worker did observe a pocket knife on a table and a handgun as well. the children do not go downstairs for care but might have to go there to seek emergency shelter in case of an emergency. Pamela noted that her husband had been down there the day before and was showing the gun to the grandchildren. We discussed those items must be secured and this worker had her secure them from access from the children before I left the home. 110.8 notes that conditions of the home shall be safe, sanitary and free from hazards

The outdoor area was observed with no hazards noted.

A full review of records noted some items needing updates:
-Pamela noted that she does test her fire alarms monthly but it was not documented.
-Three of the four dogs need an updated annual exam on the appropriate form. (Pamela did report they are scheduled in June)
- Pamela noted that at times she does give medications to children but does not document that. We discussed that documentation of any medications given is required.

In regards to the files for the children in care,

- Pamela needs an updated physical for one child.
- Pamela needs documentation signed by a parent in regards to who is allowed to pick up a child and the written permission in regards to a child attending activities away from the child care home for one additional child.

6.
