Program Population Served:

- [X] Infant(0<24 mos)
- [X] Toddler
- [X] PreSchool
- [ ] School Age
- [ ] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Sheri Schwery has been providing childcare services for 39 years. She stated that she started out a head start and then when she had her own family moved into the home setting. The provider had eight children in care today. She is full at 8 until the teachers are out for the summer, at which time she will be at four children until two new children start in August. The provider reported that she does not plan to add any other children at that time. The children were outside playing when compliance staff arrived to visit. The provider reported they were just getting ready to come back in to play when compliance arrived. The children pulled out puzzles and other toys to play with. They were very inquisitive of compliance staff. The provider reported that they keep busy throughout the day with mostly child-led play. They have a general schedule that does include two story times during the day. The childcare is located on the main level of the home and the children are spread out between two rooms and the kitchen at times.

2. Identify Observed Strengths Of The Program

Compliance staff observed the provider and child interactions during the visit. The children easily approached the provider and she helped them.

The provider uses redirection most of the time when it is necessary. She will also use a thinking time, but usually redirection will get a child back on track. The provider discussed talking directly with the child about the incident at their level of understanding so that they can learn from an incident.

The provider reported that she has multi-generational relationships with the some of the families as she previously cared for some of the parents and now she is now providing them with childcare services.

The provider reported that she really has a great group of children in her care right now. She stated that they all get along and play pretty well together.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
