	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Jill Seibert **Date:** 06-13-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

Seton Catholic Preschool is located in 2 classrooms at Seton Catholic Elementary School on the grounds of St. Mary's Catholic Church in downtown Ottumwa. The preschool is owned and operated by Seton Catholic Schools. The preschool offers morning and afternoon classes five days per week with one of the classes being a four year old early childhood education grant program offered in cooperation with Ottumwa Community School District. The before and after school program is located in the school cafeteria. The director is James Wessling school principal. This is the 7th year James has been Director of the program.

The Preschool and After-school program have been in operation since 2015 providing before and after school care and preschool. The building is a sole occupancy next to the church.

At the time of the visit, staff was actively engaged in providing the preschool program to the children and then later the after school program.

On 5/11/2023 I made an unannounced licensing visit to Seton Catholic Preschool ad After School Care and all program space was observed. I met with Director and School Principal James Wessling. On-site supervisor Sarah Palen was also present for part of the visit.

Half-Day Program:(3, 4,5 year olds): Morning Session is 8:20 to 10:50 AM; Afternoon Session is 12:20 To 2:50 PM daily, Monday through Friday All-Day Pre K Program: (4 & 5 yr olds only) 8:20 to 2:50 PM, Monday through Friday.

The school also offers after before and school care. Sara Palen is the BASP Program Director.

AFTER SCHOOL PROGRAM DAILY SCHEDULE:
3:00-4:00 pm: Supervised Free Play
4:00-4:30 pm: SNACK
4:30-5:00 pm: Homework/Pre-K to designated areas
5:00-6:00 pm: Games/Art/Physical Activities
6:00 pm: All children should be signed out to avoid late charges

The program serves children ages 3 years to school age. The visit consisted of classroom and building area review and observations of activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review.

Center Nutrition Practices Observed:

Meals are served family style in the classrooms. The kitchen area in the school age room has been updated this past year and contains newer equipment, sufficient storage for center food, and sufficient dish washing capacity to accommodate a program of this size. Posted menus should indicate that minimum nutritional requirements are being met.

CCNC Matzen e-mailed the following information to Mr. Wessling and Ms. Palen in 2019. She provided information on avoiding known food allergens. The most current USDA CACFP meal patterns are on the CACFP website. CACFP Center Handy Guide to Creditable Foods is also available on line for review.

Food allergy tips for children in the facility with a food allergy have been discussed with CCNC Crouse.

Iowa DHS Child Care Centers and Preschools Licensing Standards and Procedures: Section 109.15 Food Services, Nutritionally balanced meals or snacks
The center shall serve each child a full, nutritionally balanced meal or snack as defined by the USDA Child and Adult Care Food Program (CACFP) guidelines.

The center established policies regarding food brought from home for children under five years of age who are not enrolled in school. A copy of the written policy is given to the parent at admission. Food brought from home for children who are under five years of age who are not enrolled in school shall be monitored and supplemented if necessary to ensure CACFP guidelines are maintained. The program is not participating in the CACFP program.

Center Health and Safety:

The center administers prescription and non-prescription medication in accordance with licensing regulations, physician directions, and parental consent. The center currently has no medication or children with allergies. We reviewed compliance with regulations regarding staff and child hand washing, storage and maintenance of a first aid kit, emergency plans and drills for fire and tornado, environmental testing and the maintenance of any necessary detection equipment, and general regulations regarding safety and sanitation policies and procedures.

Carbon monoxide detectors are present. Radon testing indicates a pCi/L level under 4. Updated testing is due every 2 years. The program rooms should be monitored annually for the possibility of chipping of lead based paint. The school has boilers, but the current inspection expired in February 2022.

The program is secured by a locked door. Parents must ring a door bell and be buzzed in.

CCNC Matzen discussed that any child whose parent or health care provider has listed an allergy on the child health forms, needs an Allergy Action Plan completed and signed by the child's health care provider and parent. Staff needs to know what to do if child is having a mild or severe allergic reaction to a known allergen. It was decided that the FARE Food Allergy Action Plan could be adapted and used for a child with any known allergen (e.g. insect stings, pollen, dust, etc.).

They discussed care plans on the HCCI website for children with other health care needs (e.g. Seizure Action Plan, Asthma Action Plan). Jamie Crouse is the new CCNC and can be accessed anytime for health and safety questions. No children in the program currently have allergies.

Center Playground:

The center has a fenced grass outdoor play area immediately beside the center. The area features commercial climbing equipment and poured rubber surfacing. Benches were added 2 years ago. Shade is provided by trees. The Child Care Weather Watch should be utilized to assess whether outdoor play is appropriate due to questionable weather conditions. A first aid kit is taken outdoors. In 2019 Iowa Department of Public Health Child Care Nurse Consultant Jane Matzen reviewed the outdoor play equipment being installed as well as review and assist with any and all other health and safety.

Center Transportation Arrangements/Field Trips:

The center does not provide transportation. Walking field trips are not being taken at this time. Groups may take walks around campus which is not considered a field trip.

Center Administrative Records:

Child misbehavior is addressed by redirection, positive reinforcement of appropriate behavior. The center is in compliance with regulations regarding required notices and postings and required written policies provided to parents in the form of a parent handbook.

All required postings such as Mandatory Reporter laws, No smoking signage, the center license and consultant contact information.

Staff and child records were examined during this inspection. On 5/16/19 CCNC Matzen had a meeting with Mr. Wessling and Ms. Palen. She provided Child Health Forms from the HCCI website. It was decided that they would use these forms

to gather emergency contact information and the parent form on their child's health will be completed at least yearly for each child in the program. The physical exam portion will be completed and signed by a health care provider yearly for preschool aged children. They agreed on a method to gather health information, then discussed special health needs care plans. Staff and child records are mostly complete and well organized. Staff physicals are current. The program agreed to get these training completed before the 2022/2023 school year begins. SING checks and fingerprint results are behind for a few employees.

Emergency Preparedness training is conducted annually with all staff on the EPP for the building. They have signed and dated acknowledgement of such.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

The center space was painted 3 years ago.

The center has a history of working with IDPH CCNC. This is duly noted.

The center Director and OSS have been long term employees of the program.

The program has had no formal complaints in the past 11 years.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

1. 109.6(6)c: Center repeats Iowa record checks at a minimum of every two years or when aware of additional child abuse or criminal history that occurs.

2. 109.6(6)d: Center repeats national criminal history checks at a minimum of every four years or when aware of additional history that occurs.

3. 109.7(1): All staff(within first 3 months of employment)Two hours of approved training FOR the mandatory reporting of child abuse. At least one hour of training regarding universal precautions and infectious disease control. Certification in American Red Cross, American Heart Association, American Safety and Health institute or MEDIC First Aid infant, child, and adult cardiopulmonary resuscitation (CPR) OR equivalent certification approved by the department. A valid certificate indicating the date of training and expiration date shall be maintained. Certification in infant, child, and adult first aid that uses a nationally recognized curriculum or is received from a nationally recognized training organization including the American Red Cross, American Heart Association, American Safety and Health Institute or MEDIC First Aid or an equivalent certification approved by the department. A valid certificate indicating the date of training and expiration date shall be maintained. Minimum health and safety trainings, approved by the Department. If significant changes occur to content, the Department may require the training be renewed. Universal Precautions training is due annually. The Director agreed to ensure UP training was taken by the start of next school year.

3. 109.11(3)d: Record of monthly inspections of outdoor recreation area and equipment shall be kept. The Director agreed to keep documentation of these inspections.

I made a referral to CCR&R on 6/13/23 to assist with any/all of the violations.

V. SPECIAL NOTES/RECOMMENDATIONS:

The Director may meet with IDPH CCNC Jamie Crouse and CCR&R Child Care Consultant Karen Lauer for licensing issues and best practice suggestions.

Based upon this review, it is recommended that this center remain in Full licensing status. The center is directed to correct the items listed in Section IV. The Director gave me a verbal commitment that the noted rule violations would be promptly corrected. It is important to note, all DHS licensing standards and procedures must be maintained during the renewal period.

DHS encourages you to contact Child Care Resource and Referral Consultant Karen Lauer. They offer centers assistance with meeting the DHS regulations, QRS, infant/toddler concerns, room arrangement and environment, developmental concerns, Best Practice information, CDA assistance, or any questions or concerns you may have. Consultant Lauer provided consultation prior to the 2022 DHS visit.

DHS encourages you to contact your local nurse consultant jamie Crouse. Iowa Department of Public Health Child Care Nurse Consultant Jamie Crouse (American Home Finding Association-Ottumwa) works with child care and early education businesses. Businesses may call or send questions to a child care nurse consultant about health and safety policies, health programs, health of personnel, and specific child health or safety issues.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
