Summer					0

1. Basic Overview

An unannounced licensing visit was made to Impact After School Care (ASC) on 8/26/25. The center opened on February 11, 2014. Services are offered to children in kindergarten to sixth grade Monday through Friday before school 6:30 AM to 8:00 AM, after school 3:30 PM to 5:45 PM, early out days, and full days during the summer. The program is located in Zion Congregational Church located at 103 E. Main St, Treynor, Iowa. There are 44 children enrolled. Jordan Campbell is the director. He has a Bachelor's of Arts Degree and child development related experience. I met with Jordan during my visit.

Program room:
The center utilizes a large room that is connected to the kitchen area of the church. There is a fun variety of age and developmentally appropriate toys and equipment. The program uses a variety of resources for their religious based curriculum. One of the curriculum resources is called The Big Picture Interactive Bible Story Book for activities and bible verses and stories. The program has homework time, rotates games, toys, and crafts frequently. Jordan posted lesson plans and a daily schedule. Jordan provides an annual newsletter and a newsletter for the summer program. Thirty children and five staff were present. They were in ratio. The children arrived from school, washed their hands, then sat down for snack. They prayed and then ate snack. After snack, Jordan read during devotional time and then the children went outside. Indoors, there are a variety of toys. Half of the room is for active play and the other half of the room is for sit-down play.

Nutrition:
The center provides breakfast and an afternoon snack each day. For full day programming the children bring their lunch and it is stored in the refrigerator. Food was not properly sealed. Please seal all food after opening. There are thermometers in the refrigerator and freezer. The center doesn't participate in the federal food program. You must follow the CACFP guidelines even if you aren't on the food program. Please refer the CACFP food program guidelines to ensure you are serving credible snack food items.

Health and safety:
Medication management procedures are followed when a child is prescribed medication. The fuel burning inspection was completed on 11/7/24. A radon mitigation system was installed in December 2019. Radon testing was done in March 2025 with a score of 3.3 pCi/L. Fire and tornado drills are practiced and documented on a monthly basis. The center has first aid kits, but they are not labeled. Please label your first aid kits. Staff took the first aid kit with them when they took the children outside. The center has a carbon monoxide detector. Purell Surface is used for sanitizing. Please make sure to follow the correct sanitizing and disinfecting procedures and are using the three-step bottle procedure 1. Soap/water for cleaning, 2. Water for rinsing, 3. Your EPA and child care approved product for sanitizing and disinfecting. Handwashing procedures were not posted. Please have these posted in all bathrooms.

Playground:

CHILD CARE CENTER ANNUAL EVALUATION

The playground area has a pavilion with electricity. This provides a shaded area. Grants have been received for playground renovations. They recently put up shade tarps. The playground has tetherball, a basketball court, a gaga ball pit, and wiffleball. The playground is open to the community. Playground mulch is used for surfacing.

Transportation:
No transportation services are offered at this time. The school bus transports the children from the program to school and to the program after school each day. The center takes walking field trips to the library and the park.

Administrative records:
Staff files were read. Jordan's physical was not current, but he has one scheduled. Physicals are required every three years. He did not have the total number of annual training hours; however, he completed them the day I was present and emailed me the certificate. Staff are required six hours of training every year and the director is required to have eight hours every year. Child files were read. None had permission to secure emergency care in case of an accident or illness. Please review all child files and have them updated as required. Jordan maintains daily contact with the staff through Brightwheel.

2. Identify Observed Strengths of the program

Jordan works very hard to provide a fun program for the children. The staff had excellent interactions with the children. The program is an excellent resource for the community. The center receives grants and upgraded the cameras throughout the church.

3. Identify the aspects that fall below the standard

109.7(2): Center directors and all staff have the required contact hours of training. The director is required to have eight hours of training every year. Jordan was short but completed the training the day I was present. Please make sure all staff have the required contact hours of training.

109.9(2)a-c: All files contain sufficient information to allow the center to contact the parent or emergency contact at any time child is in center's care as well as who can pick up the child as authorized by the parent. None of the files had the necessary information for the center to secure emergency care in case of an emergency in the event a parent/guardian could not be contacted. Please obtain the necessary information and form to allow the center to secure emergency care, if needed.

109.10(5): Staff hand washing: The center shall ensure staff demonstrate clean personal hygiene sufficient to prevent or minimize the transmission of illness or disease, Handwashing directions were not posted. Please post handwashing directions at all sinks.

109.13(5)b: Sanitary and safe methods in food preparation, serving, and storage sufficient to prevent transmission of disease, infestation, and spoilage are followed. Staff preparing food that have injuries on hands wear protective gloves. Staff serving food use clean serving utensils and have clean hands/wear protective gloves. All food must be sealed in an airtight container after opening. Please seal and label all food after opening.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/Recommendations

A full license is recommended for 2-1-2024 to 2-1-2026.
