	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Nate Knepper **Date:** 07-14-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A.

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

A licensing visit was conducted on 7/14/23. The director and the on-site supervisor were both present throughout this visit.

All areas of the program were observed. These areas observed consisted of classroom observations and activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review. The most recent COVID updates were also reviewed.

Sacred Heart Plus is a center under HHS (formerly DHS) licensing. The center was given permission to open on 6/1/15. Previous to HHS licensing, the center was under the oversight of the Department of Education. This center serves children who attend Sacred Heart School and are ages three through 12 years of age. The center uses the Creative Learning Curriculum in their teachings. The center is open year-round had has a before and after school component, extended care, and a summer program in two different buildings on the Sacred Heart campus.

The center is overseen by a Board. The center director is Jessica Zeimen. Jessica has an AA degree in Business as well as some education classes. She has worked for Sacred Heart Plus for many years. Jennifer Leon is the on-site supervisor. Jennifer has her BA degree in Social Work. Jennifer has also worked for Sacred Heart Plus for a number of years.

During the visit, children were observed in free choice play at the different learning stations within classrooms, playing outside on the playground, washing their hands, and getting ready for afternoon naps in the preschool room. Good staff-child interactions were observed and overheard.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

There continues to be a good mix of new and tenured staff. The director and on-site supervisor felt staff work well together.

The center has a good partnership with other businesses in the community as well as the school and the church.

Parent involvement is stressed and encouraged.

Once a year, for roughly one week, the center closes for a thorough professional cleaning of the center and for staff to get professional development training hours.

The center has a website through the school.

The center has a walkie-talkie system in place between staff in order to provide better communication and supervision.

The center works with CCR&R and their nurse consultant on a regular basis.

The director has monthly staff meetings with other directors who are part of the diocese as well as director meetings led by CCR&R.

There is a secure entrance into the center. There is also a security camera system in place.

A cleaning crew cleans the center classroom areas nightly. Staff are also doing extra cleaning, sanitizing, and disinfecting daily.

Staff and children wear center shirts on field trips so that all staff and children are more easily identifiable

The center has an outdoor garden where they are growing several different vegetables and children are learning about these vegetables.

Enrollment has increased over the past year.

The center is in the process of having a new playground structure and area installed for the school-age children.

There are incentive bonuses for staff for meeting and going above requirements.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.15(1): Center shall serve each child a full, nutritionally balanced meal as defined by CACFP guidelines. Children at center two hours or longer shall be offered food of not less than two hours and no more than three hours apart unless child is asleep.
1. The schedules need to be adjusted some as discussed during the visit so that meals are between two and three hours apart (can be more than three for children who nap).
2. Cow's milk needs to be one percent or skim.

V. SPECIAL NOTES/RECOMMENDATIONS:

Radon testing was last completed 3/17/23 - 3/20/23. Both preschool classrooms came back with radon levels below the 4.0 cutoff. Because levels were below 4.0, the center can move to testing for radon at least every five years now. So long as radon levels remain below 4.0, they can remain on a five year plan. If at the next testing levels in any classroom come back 4.0 or higher, the center will have to have a mitigation plan, retest, and at least temporarily move back to testing every two years.

The furnace was last inspected 3/13/23.

It was noted that only school-age children go on field trips off campus. The center contracts with the West Des Moines School District for busing. Younger children take walking field trips around the campus. The center will also bring in different agencies for presentations to children.

I-Power and IQ4K were discussed at the visit.

The CACFP smart phone app was discussed at the visit.

A new, full, two-year license is recommended. The application and payment was sent in on 7/13/23.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
