[ ] School Age

[X] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

This report encompasses the pre-inspection at the new childcare location; this new location is approved for registration. The provider has applied to become a C2 home provider. This report is also the annual compliance report. Jackie Hansen has been a childcare provider for over 16 years. Jackie has a Early Childhood Education degree. She is also currently in school to obtain her accreditation of Birth to 3rd grade education. Her now co-provider, Michele McDaniel has been a childcare provider for over 30 years. They will have one substitute, Patty, who has worked with Jackie in her home for about 6 years as a substitute. They also have three assistants who will be helping out the childcare over the summer and whenever it may be needed. At the visit on this date, the provider did not have any children in care. She has been moving items into the new location and setting up to open on May 28th. The provider reported a very busy summer ahead. They are preparing for a full house all summer. The childcare is spread out on the main level of the home. The square footage meets the requirements for play space in a C2 home. The provider reported that she does keep a general schedule throughout the day. During the school year, she has preschool program with the children. When it is play time, it is free play for the children to choose their activity.

2. Identify Observed Strengths Of The Program

The provider is very organized. The home is ready to start kids back on Thursday in this fresh space. The provider offered two times over the weekend for parents and children to visit the new location to help prepare the littles for the new space.

The provider talked about the children she cares for as if they are her own. She told me that she has long lasting relationships with the families that she works with.

The new location has a large fenced in back yard with lots of play stations and shade for warm days. She reported that over the summer they are outside as much as possible.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
