Program Population Served:

- [ ] Infant(0<24 mos)
- [ ] Toddler
- [ ] PreSchool
- [ ] School Age
- [X] All Ages

1. Basic Overview

Wendy Galloway has been providing childcare services for a total of 31 years. Her co-provider Donn Galloway has been providing childcare services with her for 15 years. The providers utilize the main floor of the home for childcare. There are two bedrooms used for play and napping, a living room, and dining room areas. The home has all necessary signage for regulation. The routes for emergency exits are posted and visible to children and families. When compliance staff arrived for the visit, the providers had 10 children in care. The children were playing with toys in the bedrooms. Two infants were in the living room with one of the providers. They were in chair type seating and had toys to play with. The providers also have 5 children who are before and after school attendees.

2. Identify Observed Strengths Of The Program

CHILD CARE ANNUAL EVALUATION

Compliance staff observed the providers with the children in care. The children were attended to by both providers during the time of the visit. Compliance staff observed the children involved in free play activities. The children reported they like to play with the cars and dolls that are there for them.

The children easily asked questions of either provider. When an issue arose between children, the provider used redirection talking with the children and had them move around to create space and give them time to calm down.

The providers also offer activities for children during the day like coloring, singing, dancing and puzzles. They go outside when the weather is cooperative. and do bubbles, chalk and run around the fenced in yard.

3. Identify The Aspects That Fall Below The Standard

110.8 (4) b : Procedures are in place for: Evacuation to safely leave the facility, Relocation to a common, safe location after evacuation ,Shelter-in-place to take immediate shelter where the child is when it is unsafe to leave that location due to the emergent issue, Lock down to protect children and providers from an external situation, Communication and reunification with families, Continuity of operations, and Procedures to address the needs of individual children, including those with functional or access needs.

**The emergency preparedness plan will need to be updated for this location. Compliance staff emailed a fillable copy to the providers. Please send a completed updated copy to compliance staff by May 31, 2026.

110.9 (1) : Certification in infant and child first-aid that includes mouth-to-mouth resuscitation .If they are unable to locate first aid training that includes mouth-to-mouth resuscitation, they must complete both a first aid course and CPR.

**The providers First Aid/CPR training expired at the end of September 2025. After visiting the childcare, Wendy contacted compliance staff to report that they are now in a class in April. Once the providers have completed the training and received their certificates, a photo of each certificate should be texted to compliance staff at 712-435-0576. This should be received by May 31, 2026.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

At this time the 2026 guided compliance measure is not complete. This will be looked at when the providers send an updated copy of the Emergency preparedness plan to compliance staff.

This is a reminder that both providers will need to take the Mandatory Reporter Training by the end of June 2026.

A referral to CCR&R will be made to connect you with help for IPower and trainings. We do not want you to have the difficulties you did at your last renewal.
