- [ ] Non Registered Child Care Homes accepting CCA

Program Population Served:

- [ ] Infant(0<24 mos)
- [ ] Toddler
- [ ] PreSchool
- [ ] School Age
- [X] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Haley Barage started her childcare business three years ago. She does have one substitute who helps if she has appointments to go to. The provider works with the food program and she utilizes Brightwheel for communication with families. She had seven children in care at the time of the visit. The children were playing outside when compliance staff arrived to the home. The childcare is held on the main level of the home. There is a living room area, a large playroom and an additional room that is sometimes used for napping.

2. Identify Observed Strengths Of The Program

Compliance was able to observe the provider with the children at play. The provider was actively supervising children at play outside. The children easily approached the provider for needs.

The provider reported her strengths include finding new activities to engage the children. They have planted a wildflower garden and raised butterflies. They have bird feeders that they fill and watch for the birds to come and eat.

She strongly believes that children learn best through play. She does not have a pre-school program, but she does have activities that allow children to work on writing letters, numbers, and their names.

3. Identify The Aspects That Fall Below The Standard

110.7 (2) e : The provider maintains a written record of the number of hours substitute care is provided, including the date and the name of the substitute.

**The provider reported that she has not been documenting the hours her substitute has covered for her. We talked about ways for her to document so that compliance staff can review at her next compliance visit.

110.9 (4) d : For infants and preschoolers: An admission physical examination, on the first day of attendance, including past health history, status of present health, allergies and restrictive conditions, and recommendations for continued care when necessary. The date of the exam is not more than 12 months before the child's first day of attendance.
110.9 (4) g : A signed and dated immunization certificate provided by the state Department of Public Health.

**The provider had some child files that do not have intake physicals or immunization records. The provider will work with the caretakers to receive the information soon. Child files will be reviewed at your next compliance visit.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
