	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Jana Drew **Date:** 01-28-2025

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

Visited Crittenton Center Stella Sanford CDC West High on 01-17-25 and spoke with onsite supervisor Connie Maldonado. Ms. Maldonado has been with Stella Sanford for the last twelve years. She also has an education certificate for a Para Educator. Danelle Haas is director and was not present. Stella Sanford Child Development -West High is located in one room at West High School. Visitors must be buzzed in to enter the school building. Parents and other visitors must be buzzed in by the staff to gain access to the infant room. The center serves children ages 6 weeks to 24 months. The infant program operates Monday through Friday 7am to 5:15pm year round. Center does close for one week in the summer for the school to wax the floors.

There are 21 children enrolled in the program. At the time of the visit there were 15 children present. All areas of the program were observed. These areas observed consisted of classroom observations and activities, health and safety practices, field trip and transportation practices, and administrative review. The center continues cleaning toys daily that children use. Sufficient amount of toys and equipment for the number of children. Daily schedule of activities was posted. Observed staff assisting children with a variety of activities, talking to the children throughout the visit. Staff had good interaction with the children. The program uses the Playground Childcare App and is on the IQ4K level 3.

The infant room is separated into three areas: mobile infants, 18-24 month infants and non-mobile infants. However the mobile area tends to combine with the 18-24 month old depending on the need of the kids. They also have a separate eating area. There is an abundance of age appropriate toys for the children to play with in each area. The center transitions the children from cribs to cots as they become more mobile and are developmentally able to handle the transition. During mealtimes they utilize highchairs for the very young infants and small tables with three sided chairs for the children who are walking. Center has several changing tables/sinks in the room. The staff provides a nurturing environment for the children to learn and grow. Staff files are located at the main office and will be reviewed at a later date.

Refrigerators are clean and kept at the appropriate temperature. Snacks are provided by the center. Lunch is provided through the school system and breakfast/snacks through Stella Sanford Center. Good food storage practices were observed. The center follows the CACFP guidelines for nutrition. Menus were posted. Center participates in the CACFP program.

Medication is stored in a lock box or out of reach of the children. Center follows proper guidelines for administering medication. Tables are sanitized prior to children eating. Observed good hand washing procedures by staff and children. First aid kit is sufficient to treat minor injuries. Fire/tornado drills are documented each month. Radon test was in normal range provided by the school. Annual heating inspection was unavailable at time of visit. Good sanitary procedures are followed. Center has a functioning carbon monoxide detector. All program areas were observed to be clean and well maintained. Good health and safety policies /procedures are in place. It is recommended to remove bobby pillows as they are only to be used for nursing mothers.

There is a fenced-in, grass covered playground is adjacent to the center. Shade is available on the playground. Staff bring toys out to the playground for the children. Staff place the infants in strollers that can hold up to 4 infants and take them for rides through the halls of the school. The center does not go on field trips.

Goals of the center is to have staff do more trainings. There is rumor that the school may need them to relocate their program and would be nice to confirm if that is going to happen. Otherwise to update playground.

Strengths of the program is that staff work well as a team and good relationship with the families they serve as well as reliable to the program. The program also have a couple of bilingual staff.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

Infant room usually has more staff than required by licensing standards.

Center staff very conscientious about keeping environment clean.

Center shares information given to them with parents. Such as tummy time articles, safe sleep positions and back to sleep.

Toys are at the children's level and accessible in the infant and preschool rooms.

Staff has very positive interaction with the children, work well as a team, and have a good communication with parents and the school.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.9(2)b: All files contain sufficient information and authorization to allow the center to secure emergency medical and dental services at any time child is in center's care.
Number not in compliance for dental: 3

109.10(1)a: Preschool (for children five years and younger not enrolled in school): Physical exam report submitted within 30 days of admission, was obtained no more than 12 months prior to admission, is signed by a licensed MD, DO, PA, Chiropractor or ARNP, and contains health history; present health status including allergies, medications, and acute/chronic conditions; and recommendations for continued care if necessary.
Number not in compliance: 4

109.11(7)c: All centers: Annual inspection prior to heating season of all fuel-burning appliances to reduce risk of carbon monoxide poisoning and shall install one carbon monoxide detector on each floor that conforms to UL Standard 2034.

V. SPECIAL NOTES/RECOMMENDATIONS:

It is recommended to continue working with CCRR for support.

Please email licensing consultant confirming those items that fall below standard have been corrected by 02-25-25.

At least one visit will be made to the center during the next year.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
