Program Population Served:

- [X] Infant(0<24 mos)
- [X] Toddler
- [X] PreSchool
- [ ] School Age
- [ ] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Amber Crozier has provided childcare services for close to 20 years. She is currently a level 1 IQ4K rated childcare development home. She has also been ChildNet certified. The provider works with the food program. When compliance staff arrived, the children were playing on the main floor of the home. Once compliance entered, they helped to show compliance staff all the places they play in the home. There were five children in care at the time of the visit. The provider reported that she has two pre-schoolers who will join the group after the morning class is over. The childcare is located on two floors of the home. The main floor of the home has a living room, kitchen/dining area and one bedroom that is used for naptime. The lower level of the home has two bedroom areas that are used a play rooms and nap rooms. The lower level has permanent stairs that lead to a window for escape in an emergency.

2. Identify Observed Strengths Of The Program

Compliance staff observed the interactions between the provider and the children. The children easily approached the provider for help or needs. The provider actively observed the children during the visit.

The provider talked about the childcare day. They have been going outside for an hour right away in the morning recently to beat the high temperatures. When they return to indoors, the children have free play time. They have time for reading books and doing small craft activities. Occasionally, they will watch a child centered video to help with physical activity inside the home.

The provider discussed that she will use redirection with the children. She will help them find a new toy or activity. If redirection is not successful, she will then have the child sit away from the area with her. She will then talk with the child and have them explain what happened. She reported that she has great communication with parents and this is one subject she lets parents know when it occurs.

3. Identify The Aspects That Fall Below The Standard

110.9 (4) g : A signed and dated immunization certificate provided by the state Department of Public Health.

**While looking through child files, compliance found that at least one file was missing an immunization record or signed exemption. Please work with your families to receive annual updated information on the children in your care. Child files will be reviewed at your next compliance visit.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
