General				75	75
Summer					0

1. Basic Overview

An unannounced licensing visit was completed at this center on 10/1/25. Taylor Paulsen is the approved on site supervisor and was present along with other staff. This site is one of several before/after school programs offered in a school building and owned and operated by the YMCA IMV. The YMCA IMV has a well-defined administrative structure. The center is non-profit. Lindsay Wadsager is the center director for all of the licensed child care sites. Lindsay was not present on the day of the visit. Brent Ayers, Associate Executive Director of Child Care for the YMCA IMV was present as one of the staff. This particular site is located within the Paul Norton Elementary School. The program serves children from this school only and only on school days before and after school.

The program continues to use the cafeteria room as the primary program space. The program uses the school gym when available and portions of the outdoor school playground area as well. There were games, art/drawing supplies, paper and pencils and other items of interest for the children to use. Materials are organized and are stored in several cabinets located at one end of the cafeteria space. Boys and girls restroom areas are located around the corner off of one end of the cafeteria. Staff have been reminded to ensure they are always traveling with children to supervise restroom areas and hand washing while maintaining ratio as is required. All program space was observed.

The center serves breakfast and afternoon snack during child care hours for the child care children. Breakfast is prepared by the school as a contract arrangement between the center and the school. Snack is provided by the YMCA IMV Davenport Early Learning Center site. Snack items are brought to this site from that location. The center does participate in the CACFP.

2. Identify Observed Strengths of the program

This center continues to report a positive partnership with the school. There continues to be good support from the community for the program. The staff appear to be quite familiar with and are good with the children. The children respond well to the staff. The staff appear to work well together. Licensing documentation was found to be organized.

3. Identify the aspects that fall below the standard

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

N/A

CHILD CARE CENTER ANNUAL EVALUATION

5. Special Notes/Recommendations

1. Refrigerator needs a working visible thermometer to be monitored for proper functioning for safe food storage (appears to be broken). This was noted previously. Freezer needs a thermometer.
2. Ensure staff files include all training certificates (or that this can be verified on ipower) and that all staff are maintaining annual training hours requirements.

The center will continue with a full license. Please address the concerns noted in the report so that corrections are obvious and ensure that items remain in compliance. This report does not require a written response. Thank you.

Date: 10/27/2025

HHS Licensing Consultant: Heidi Hungate

Non-compliance with any of the mandated regulatory requirements listed above may lead to the cancellation or revocation of your Child Care License. Please take steps necessary to completely address each of the violations noted above.

Child Care Resource and Referral is an excellent resource for providers to access training options and support in your area. You can reach Child Care Resource and Referral at **https://iowaccrr.org**.
