1. Basic Overview

On 09/11/25 I made an unannounced licensing visit to Community Lutheran School Preschool in Readlyn. I met with Teresa Imbrogno, the director and lead teacher of the three-year-old preschool class. Ms. Imbrogno has a BA in elementary education and several years of experience in childcare. She has been with Community Lutheran School Preschool since 2012. Judy Schutte oversees the program when Ms. Imbrogno is away. Ms. Schutte has been with the program since August 2013. Amanda Eike is the associate in the room for the preschool program. Ms. Eike has been with the program since August 2025. Lesley Mohlis provides childcare to the four year old children in the afternoon. The program employs a total of six staff members.

This program was given permission to open in August 2013. The program operates out of St. Paul's Evangelical Lutheran Church. It is open Monday through Friday and operates from 7:00 am until 5:30 pm. The three-year-old preschool class offers the option of attending Monday through Friday, Monday, Wednesday and Friday or Tuesday and Thursday. The preschool hours are 8:00-11:30 am. The additional hours are for childcare. It serves children three-years-old through school-age. The program does not operate during the summer. There is currently a total of 37 children enrolled in the program. They have sixteen preschool children and twenty-one school-age children.

Community Lutheran School operates out of two locations. Preschool through second grade operate out of the Readlyn location and third through eighth grade operates out of a location in Klinger. The Readlyn location is the only one with a licensed childcare program.

The licensed program operates out of two classrooms. The preschool classroom is also where before school childcare occurs. The second room is used for childcare for the four year old preschool children. An inspection of each room was completed. The program was within ratio during my visit. Windows provide natural lighting in both rooms. The preschool room is decorated with pictures of the children and their families, pictures of the children's pets, pictures of the children's homes, the children's art projects, and posters to assist the children with the learning process, such as the alphabet, shapes, colors and numbers. There is an area for circle time. The classroom has a smart board.

The centers observed on the day of the licensing visit include library, Lego/blocks, table toys, games, puzzles, transportation, computers, art, dramatic play, listening, writing, math, science/discovery, woodworking, sensory table and music. Centers were arranged in a manner that allowed easy movement between activities and allowed clear supervision by staff members. Materials were in good condition. The materials are located at child level so they are easily accessible to the children. Materials are switched out routinely to give children variety.

There is a bathroom with one toilet inside the classroom. There are two sinks outside of the bathroom. Handwashing procedures were posted. The children can also use two bathrooms located in the hallway. The girl's bathroom has three

CHILD CARE CENTER ANNUAL EVALUATION

toilets and one sink and the boy's bathroom has two toilets, one urinal, and one sink. Handwashing procedures were posted in both locations.

Mats are used to nap. They are stored individually in sacks.

The program uses a variety of resources to develop lesson plans. They use ECERS-3, Iowa Early Learning Standards and Creative Curriculum are guides for room arrangement, developmental areas of focus and a way to assess students. Activities are typically developed around weekly themes, but they may last longer depending on the topic and children's interest level. The program is a Christian setting. Daily religion time is held throughout the day using the Enduring Faith Religion Curriculum. They attend a chapel service once each week. A weekly newsletter is provided to the parents. Daily reports are provided to the parents to inform the parents what the children did during the day. Parent-teacher conferences are in the fall and the spring. Child portfolios are maintained on an on-going basis.

There was a phone with emergency numbers and the program's address and phone number in the classroom. Emergency fire and tornado procedures and the evacuation diagram were posted by the main program door and outdoor exit in each room. A daily schedule was posted and a lesson plan was available for review.

I reviewed documentation of monthly fire and tornado drills. I reviewed documentation of monthly playground inspections. A radon test was completed in August 2025. The results were within the EPA recommended guidelines. A radon mitigation system was installed in February 2017 after having repeated high radon testing results. Radon testing must occur every two years due to the program having a radon mitigation system.

The fuel burning inspection was completed and no concerns were noted. A carbon monoxide detector was on site and is located near the entrance. Outlets were protected. The fire marshal inspection occurred on 02/19/24. Fire marshal inspections must occur every three years.

The program does not participate in the Child and Adult Care Food Program (CACFP), but they do follow the guidelines. The children can purchase lunch through the school. The school is on the CACFP. The children can bring their own breakfast in the morning if it is nutritious. The parents provide the morning snack for the preschool program and the school provides the drink. Suggestions for snacks are provided to the parents. The parents pay a milk fee. Parents purchase a hot lunch ticket and a juice and milk ticket for children who utilize the after-school program. An afternoon snack is provided by the school.

Parents also have the option of bringing a cold lunch for their children. Lunches brought from home are monitored to make sure parents are providing five of the CACFP components. If they do not have the necessary components the program is able to supplement the meal. Menus were posted. Snacks are eaten in the room and lunch is eaten in the church commons/cafeteria area. Disposable products are used.

The school has a milk cooler that the program uses and a thermometer was present.

The program uses bleach and water to sanitize the food tables in the classroom for morning and afternoon snacks.

The program has a fenced in playground. Pea gravel is used for fall surface cushioning. There is a piece of climbing equipment with slides. There is a second piece of equipment that has swings, a slide and rings. There is dramatic play equipment, a sensory table, a basketball hoop and a playhouse and play ship for the children. There are also other activities for the children to play with such as trucks and pails.

The parent information is located on a bulletin board inside the classroom. The mandatory reporter, childcare consultant and the handbook availability were posted. The license was conspicuously hung. A no-smoking sign was posted at the entrance.

Staff and children's files were reviewed at the time of the licensing visit. I reviewed six children files. They were in great condition.

I reviewed two staff files. They were in great condition.

I reviewed policy and procedures, staff and parent handbooks. The necessary written emergency procedures and policies

were present. Emergency Preparedness Plans have been completed.

2. Identify Observed Strengths of the program

Ms. Imbrogno is an incredible teacher. Ms. Imbrogno has both a calming and enthusiastic manner in working with the children. All the staff members I observed were terrific with the children. They have amazing teamwork. The classroom provides a fun learning environment. Staff members provide clear and easy to understand directions. They talked with the children about using good manners and acknowledged the children for using good manners. The children were enjoying free play when I arrived and then they moved to the rug where they had circle time. Ms. Imbrogno includes each child in circle time and she had a fun activity to work on colors. Staff members talked to the children about using kind words. They provided the children with praise, they were patient and they were flexible. Staff members encouraged the children to try new things and she had the class clap for a child after they completed their "job". The teachers incorporate exercise and payer into their day. The children appeared to enjoy their time at the center.

The program has an IQ4K level of 1 that expires on 05/31/26.

Ms. Imbrogno states the teachers work together well and everyone does what they need.

Ms. Imbrogno states they follow the school's mission teaching about Jesus. They incorporate prayer into their class.

Ms. Imbrogno states they serve several surrounding communities.

Families are loyal and continue to send all their children to the program.

Ms. Imbrogno states they work on the children's social-emotional skills and problem solving skills to prepare them for school.

Ms. Imbrogno has organized and easy to read staff and children binders and an HHS licensing binder.

Ms. Imbrogno states they offer childcare to families on days when there is no school, but they must have a commitment of eight children to attend. They are not open if they close due to weather.

The program is in a secure building.

The program meets a need for parents who require before and after school childcare. Parents can feel secure that their children are in a safe environment and they do not need to worry about transportation.

Ms. Imbrogno states the church is committed to the program.

They attend chapel once each week, have a Daily Devotion, Bible verse and song.

The three-year-old preschool class has a Facebook page to help with communication with parents. The program also emails a newsletter each Friday to parents and will send paper copies to parents who prefer the communication that way.

3. Identify the aspects that fall below the standard

N/A

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

N/A

5. Special Notes/Recommendations

Health and Human Services

Iowa Department of Health And Human Services

CHILD CARE CENTER ANNUAL EVALUATION

A full license is issued. All DHS licensing standards and procedures must be maintained during the renewal period.

I met with Ms. Imbrogno following my observation in the classroom. The program had a terrific visit with no citations.
