	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Nate Knepper **Date:** 07-28-2023

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

N/A.

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

A licensing visit was conducted 7/27/23. The director was present throughout this visit and the two on-site supervisors for parts of this visit.

All areas of the program were observed. These areas observed consisted of classroom observations and activities, ratios, nutritional practices, health and safety practices, playground observation, field trip and transportation practices, and administrative review. The most recent COVID updates were also reviewed.

Van Meter United Methodist Kids Care is a childcare program for four year old and school age children and located in the United Methodist Church. The center operates a preschool, a before and after school program during the school year, and all day programming during the summer using one large classroom and one smaller room down the hall. During the school year, school-age children can attend from 6:30am - 8:00am and again from 3:15pm - 5:45pm. Again, there is a preschool component as well. Summer programming is from 6:30am - 5:45pm. The center utilizes their own curriculum, which is Christian based.

The program is non-profit and overseen by a Board. Jessica Jaspers is the director. Jessica has a BA degree and several years of experience working in child care, including past experience as a director at another program. Shayna Smith is one on-site supervisor as of 6/2022. Shayna has past experience working in child care and has completed a number of training hours to meet the requirements for on-site supervisor. Sarah Wyckoff is another on-site supervisor as of 7/2023. Sarah has an AA degree, her CDA, and past experience working in child care.

During the visit, children were observed coming in from outside. Children were then observed in free-choice play at the different learning stations set up in both classrooms. Child hand washing was also observed. Children discussed with this consultant where they relocate to for monthly fire and tornado drills.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

The center has a good working relationship with the church they are located in as well as other businesses in the community. The center participates in several charity projects within the community over the summer months.

Panera Bread continues to donate food to the center a couple of times each week.

The center has a lot of storage space.

Additional information about the center can be found on the church website. The center also uses a private electronic app called Child Pilot to communicate with parents.

The center splits children into two different groups which allows for better supervision and better transitions between activities, etc.

The director has past experience being a director and is organized.

The director believes she has a good staff working for her and that they have good relationships with the families they serve.

The center has a full-size school bus and a van they use for transportation needs.

The center is a pick up and drop off site for school-age children during the school year.

Enrollment has again increased over the past year.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.9(1)d: All files contain a pre-employment physical exam report completed within six months prior to hire and at least every three years. Physical exams shall be documented on form 470-5152, Child Care Provider Physical Examination Report.
Number not in compliance: 1 staff member is past due for another physical.

109.9(2)c: All files contain information regarding the specific health and medical needs of a child including information regarding any prescribed treatment.
For school-age programs in the child's school, all files include a statement signed by the parent that the immunization information is available in the school file.
Number not in compliance: 1 child was missing a physical after the first 30 days of enrollment.

109.9(3): Signed and dated Iowa immunization certificates are on file for each child enrolled.
Number missing: 1 child (same child as above) was missing an immunization record after the first 30 days of enrollment.
Number invalid: 0

V. SPECIAL NOTES/RECOMMENDATIONS:

Radon testing was conducted in both classrooms 7/14/23 - 7/16/23. Both classrooms came back with radon levels below the 4.0 cutoff. Because levels were below 4.0, the center can move to testing for radon at least every five years now. So long as radon levels remain below 4.0, they can remain on a five year plan. If at the next testing levels in any classroom come back 4.0 or higher, the center will have to have a mitigation plan, retest, and at least temporarily move back to testing every two years.

The annual furnace inspection was last completed in 7/2023.

As previously mentioned, the center has their own full-size school bus as well as a van that they use for transportation of children to field trips.

IQ4K and I-Power were again discussed at the visit.

It is recommended that staff files be organized directly per the staff tracking sheet as staff become more tenured over the years.

It is recommended that playground mats be purchased for under the swings. This will help preserve the wood chips and wood chip fall zone surfacing/depth.

A new, full, two-year license is recommended. The director sent in the application and payment on 7/7/23.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
