[ ] Non Registered Child Care Homes accepting CCA

Program Population Served:

[X] Infant(0<24 mos)

[X] Toddler

[X] PreSchool

[ ] School Age

[ ] All Ages

CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Kyanna Hansen is just opening her childcare in Red Oak. Her background includes 8 years in childcare settings. She also has experience in preschool educational setting that she will bring into her childcare. The childcare space in the home will primarily be the main floor of the home. There is a large play area attached with the living room, dining room area and kitchen. The lower level of the home has a playroom, but the provider is not certain about using this area for childcare at this time.

2. Identify Observed Strengths Of The Program

The provider brings an educational background to the children that will be attending her childcare. She will incorporate learning opportunities into her program.

The provider was observed as being attentive to children in care. The provider also plans to add a helper to her registration for the summer or other school breaks.

3. Identify The Aspects That Fall Below The Standard

The provider is in full compliance with regulation standards at this time.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.

The provider does have an above ground pool in the back yard. The provider has a plan to enclose the pool with non-climbable fencing in the spring. Discussion with the provider as to the compliance measures with a pool. At the current time, the pool is not full. The provider reported that they need to fix a hole prior to putting water in the pool. They also will have the fence put into place prior to placing water in the pool.

A safety plan is established with the provider that the pool will not be filled until the non-climbable fence is set up and the area is locked an not accessible to children in childcare.
