X	**FULL** license from 10-01-2024 to 10-01-2026
	PROVISIONAL license from
	DENIAL of initial application
	SUSPENSION of license
	REVOCATION of license

Licensing Consultant: Jana Drew **Date:** 09-12-2024

I. IF CURRENT LICENSE IS PROVISIONAL, IDENTIFY THE CORRECTIVE ACTIONS

II. IDENTIFY THE AREAS OBSERVED ON THE VISIT:

Visited the center on 09-12-24 and spoke with Diana Vazquez lead worker as onsite supervisor Jennifer Orazada was not present. Ms. Orazada has been an onsite supervisor for the Beyond the Bell program for several years. Ms. Orazada is also onsite supervisor for several other BTB sites. The program is operated by the Beyond the Bell organization. Jenna Andrews is the director.

Leeds BTB is located in the Leeds elementary school. This year the program is using the lunchroom, gym, and a music room. Last year they only used a classroom and gym at times due to lower numbers. The building is locked, however, parents are buzzed in and bring their child into the school and sign them in on the playground application. During the school year they serve pre-school to school age children (up to 5th grade) Monday through Friday 6:30am to 8:30am & 3:30pm to 6:00pm, except on Friday afternoon's 1:30pm to 6:00pm.

There are 27 children enrolled in the program. At the time of the visit only 18 children were present before school. All areas of the program were observed. The areas observed consisted of lunch room, gym, and music room. Observed activities, nutritional practices, health and safety practices, field trip and transportation practices, and administrative review. The Program uses the playground application to assist in administration functions. The playground app helps in going paperless as well as improves communication with parents. The after school program provides various group activities as well as individual self-directed activities for the children.

Staff files will be reviewed at the program central office at a later date and any issues identified will be addressed at that time. A random selection of child files found each reviewed file contained all required forms and contact information.

Children have access to bathrooms. Daily schedule of activities was posted. Sufficient amount of equipment and toys for the children. The program has not taken field trips due to not enough staff. Some of the children eat breakfast prior to school. The center uses the school playground for outside play, however the playgrounds were being redone and under construction so currently only using a grassy area. The playground will have new climbing equipment and basketball area. Surfacing may change from rubber squares, but Diana was not sure what they will switch to. Therefore, the playground will be viewed at a later date. First aid is complete. Radon and annual furnace inspection was not available at the time of the visit.

Snacks are provided through the Sioux City Central kitchen. The program is on the CACPF program and monthly snack menu needs to be posted. The program is not currently giving any children medication as they get it from the school nurse or at home prior to entering the program.

Goals of the program is to more staff and to continue to work with students to continue to get to know them.

Strengths of the program good relationship with the parents and families they serve as well as with the school.

III. IDENTIFY THE OBSERVED STRENGTHS OF THE CENTER:

Center sends home a newsletter each month during the school year to keep parents aware of what is going on in the program.

Staff interact with the children in a positive manner.

Program utilizes the Childcare Playground App.

IV. IDENTIFY THE ASPECTS OF OPERATION THAT FALL BELOW THE STANDARDS REVIEWED:

109.9(2)b: All files contain sufficient information and authorization to allow the center to secure emergency medical and dental services at any time child is in center's care.
Number not in compliance for dental: 1
Information lacking: Information was missing.

109.10(1)a: Preschool (for children five years and younger not enrolled in school): Physical exam report submitted within 30 days of admission, was obtained no more than 12 months prior to admission, is signed by a licensed MD, DO, PA, Chiropractor or ARNP, and contains health history; present health status including allergies, medications, and acute/chronic conditions; and recommendations for continued care if necessary.
Number not in compliance: 1

109.11(7)b: Centers at ground level that use basement area as program space, or have a basement beneath program space: Testing and plan for remedy of radon is conducted.

109.11(7)c: All centers: Annual inspection prior to heating season of all fuel-burning appliances to reduce risk of carbon monoxide poisoning and shall install one carbon monoxide detector on each floor that conforms to UL Standard 2034.

V. SPECIAL NOTES/RECOMMENDATIONS:

The center needs to email consultant by 10-15-24 confirming that all aspects that fall below standards have been completed.

It is recommended to update the HHS binder and put radon/furnance inspections in the binder.

A full license is recommended at this time at this time.

At least one visit will be made to the center during the next year.

*Note: If you are the Child Care Center Director and you feel something is unclear or unjustly cited, please contact your DHS Licensing Consultant to discuss the issue. The child care director may also send a response which will be placed in the licensing file.

*Note: If you are a member of the general public, there may be additional information contained in the public file. You may contact the DHS Licensing Consultant to inquire.
