CHILD CARE ANNUAL EVALUATION

1. Basic Overview

Kristina Nail has been a childcare provider for over 30 years. Her childcare is a category B home. During the visit, she had three children in care. She reported she usually has six children daily. Today the ages of children in care were 1 and 2. The tv was playing background noise while the children were playing with toys and dolls in the playroom. Once the children saw a stranger a couple of them had a difficult time with a new face in care. The provider believes she will be full for the summer, but she is not entirely sure just yet. She will accept almost all ages of children to care for. She reported that she is no longer taking infants 0-1. The provider has all necessary signage throughout the home for regulatory compliance. The provider utilizes the main floor of her home. There is a toy room for play, a living room, kitchen area and she uses two bedrooms for napping. She has a camera system that she will use to check on children during naptime.

2. Identify Observed Strengths Of The Program

Compliance staff was able to observe the provider with all of the children. They easily approached her and stayed away from compliance staff.

3. Identify The Aspects That Fall Below The Standard

The provider was in full compliance with regulation standards.

4. Any corrective action plans, provisional license, and safety plans-steps to get into compliance

5. Special Notes/recommendations

2026 targeted compliance measure: Emergency Preparedness Plan. The provider has a completed EP plan that identifies planned actions for evacuation, shelter in place, lockdown, communication and reunification. The plan also addresses continuity of care in the event of a disaster at the location of the childcare.
