Suggestions/Recommendations:

This worker did observe some cleaners on the kitchen counter and some medication bottles on the kitchen counter as well. Julia also had some cleaners/chemicals in the bathroom cabinet that was not latched. This worker did ask the provider to move those items and discussed needing to have them out of reach of the children at all times.

Julia could not locate her written document of emergency numbers posted for police, fire, ambulance, and the poison information center.
Julia also could not locate the document with numbers for each child's parent, for a responsible person who can be reached when the parent cannot, and for the child's physician shall be written on paper and readily accessible by the telephone. Julia shared that it is normally posted in a certain area on a wall but could not locate it on this date. If not found, Julia needs to prepare new documents and get them posted .

Julia did not have any documentation of monthly testing of her smoke alarms for 2023.
Julia did not have any documentation of her monthly fire and tornado drills for 2023. We discussed the importance of practicing the drills and documenting accordingly. Julia needs to start documenting starting this month and every month following.

Julia did have an exam for the dog but it had expired in February. She needs to obtain an updated exam and ensure she has them annually and on the approved form.

Julia's adult daughter Brooke resides in the home and is an approved sub/assistant. She did not have a physical exam documented on the approved form. This is required as a household member and as a sub/assistant.
Julia also count not locate a physical and immunization record for one of the children that resides in the home. Julia needs to locate the physical and immunization records or needs to obtain new ones through their physician.

Brooke is approved as a substitute/assistant but they could not locate her mandatory child abuse reporter training verification. Julia needs to locate the training certificate or Brooke will need to retake the mandatory child abuse training.

Julia did have files for a few of the children but did not have any file at all for five of the children present on that date and could not locate an additional file. We did discuss that even if children are part time only she needs to have the appropriate information in each child's file. We also discussed that she needs to obtain that information prior to the children beginning care and not wait to receive it after that children have already been in care for some time.
Julia did have appropriate information and documents in a couple of children's files so she is aware of what is required to be in each file.

Corrective Action Required:
