On 2/26/2026, program space was observed. Primary programming occurs in the school cafeteria. The program has some access to the school gymnasium. Program materials are organized in cabinets and on mobile shelves for ease of use and storage given shared school space. Sufficient restrooms including hand washing sinks are available to accommodate total capacity. The program provides all childcare foods and has areas for food storage. On 2/26/2026, staff were observed warmly greeting children as they arrived for afterschool programming. Attendance was taken and a large staff-child group discussion reviewing early-out itinerary was had. The area of study during the month of the license visit was clearly Valentine's Day. Activities observed included sensory play with play dough, bead work, rubber band bracelet making, open crafting with various art materials, activity puzzles, individual book reading, and magnetic block building. A highly enjoyed activity that gained child followers as it progressed was noted to be an old-fashioned game of "Guess the Word" at an oversized wall mounted dry erase board! Curriculum allowed for a variety of experiences that were observed to pique child interest as well as encourage leadership, innovation, good sportsmanship, the use of social graces and child choice. During the monitoring visit, routine transitions went smoothly and included restroom-drink breaks and clean-up procedures. On 2/26/2026, staff were observed to be in ratio, utilizing positive redirection when needed and engaged in programming with the children. Staff were also observed wishing children well as their pick-up persons arrived for the day. Children appeared comfortable with staff and to be enjoying the day.
